### MG-NREGS data: Demand for work at 17-month low

According to the CMIE's data, employment in September 2021 was estimated to be at 406.2 million, the highest in 20 months or since the Covid-19 shock in March 2020.

At the same time, the number of farmers' in the country left from 116 in million in August 2021 to 113.6 million in September 2013 was CMIE "This results of 100 million in March 200 million in September 2013 was CMIE "This results of 100 million in September 2013 was CMIE".

tember 2021, as per CMIE. "This fall could imply a combination

fall could imply a combination of two factors.
First, some salaried jobs which were lost earlier have been revived and some of the farms has come back to these salaried jobs. Second, economic activity is likely to have revived to absorb additional people in the form of daily wage labourers, said Mahesh Vyas, MD & CEQ, CMIE, in a recent article.
According to the MG-MEG dashboard, generation of person days under the scheme this year till October 4 this fiscal stood at 202 crore compared with 389.17 crore recorded in the entire 2020-21.

ded in the entire 2020-21. Monthly person days generation of work also fell to a 17-month low in September this year at a little over 18 crore. The data could see some revision in the coming days as pan-India compilation takes some time.

The Centre had been gener-ous with the allocations for the MG-NREGS (the scheme's bud-MG-NREGS (the scheme's bud-get outlay for the last fiscal year was ₹1.11 lakh crore RE com-pared with ₹68,265 crore in 2019-20.

The Budget outlay for the scheme for 2021-22 is ₹73,000 crore. The government might have to allocate more fund to

meet the need for the demand-driven scheme as the Centre has already released close to ₹58,597 crore to run the scheme.

crore to run the scheme.

The scheme's mandate under the MGNREG Act, 2005, isto provide at least 100 days of wage employment' in a financial year to every rural household whose adult member volunteers to do unskilled manual work. However, an average of only 51.52 days of work were provided to such rural households in 200-21 and this year, so far, the figure is 35.

### on need for model builder-buver agreement

"West Bengal had enacted an identical law like RERA, but westruck it down as if failed the test of repugnancy," justice Chandrachud said.

However, the apex court refused to entertain some petitions flied by homebuyers who wanted adirection to the developers to compensate for the debts in scientific necessition. delay in giving possession of their flats. The Bench said that

their flats. The Bench said that these homebuyers can approach alternate fora like consumer courts for relief.

The apex court said, "Uni-form builder-buyer agreement is required to be framed by the Centre to protect interests of lakhsof home buyers. This is an important issue on protection of buyers, often put on back foot by datasets in a green per said. of buyers, often put on backroot by clauses in agreements made by builders... It is very important for consumer protection because builders try to put any number of clauses in the agreement which common people may not be aware of. It is important that this (model builder have a more protection) and the protection of buyeragreement) is achieved in the country."

Senior counsel Vikas Singh and Menaka Gurran Senior counsel Vikas Singh and Menaka Guruswamy argued that the Real Estate and Regulatory Authority Act, 2016, there should be a model agreement for States to adopt and the Centre was enjoined to frame a model agreement to ensure transparency, and fairness and to restrain builders and agents from indulging into unfair and restrictive trade practices.

The absence of "model builder-buyer and agent-buyer" agreements across the country have been the main cause behind the fraud, lack of transparency, criminal conspiracies

and unfair and arbitrary trade practices in the real estate sec-tor, they submitted. Singh argued that not a sin-gle state had framed agreements to maintain transparency and there were many cases of delib-erate delay in handing overpos-session. The police did not regis-ter First Information Reports on ter First Information Reports on the complaints lodged by buyers,

hesaid.

"Builders issue revised delivery schedule again and again, adopted unfair practices... All this amounts to

again, adopted unfair practices... All this amounts to cheating, conspiracy, criminal breach of trust, dishonestly inducing delivery of property, violation of corporate law, violation of corporate law, violation of corporate law, violation of corporate law, and the constant of the RERA mandated the establishment of a Central Advisory Council and Section 42 says that the Council would ensure the implementation of the Act. However, the court prima facie said the RERA did provide sufficient enabling powers to the Council to make Rules to prevent buyers from being exploited.

Frame a model builder-buyer agreement and model agent-buyer agreement to infuse transparency, ensure fair play, reduce frauds and deliberate.

delays ate delays, restrain builders/promoters/agents from indulging into arbitrary, unfair and restrictive trade practices and to protect the rights and interests of cus-tomers in the spirit of the RERA Act of 2016, the petitions said.

### Invesco urges NCLT to order Zee EGM

"I do believe that I welcome all the feedback and look for-ward to a very robust and healthy consultations with all the stake-holders...We are trying to balance

everybody's interest and come up with a robust framework in which this (policy)can be implemented in the interest of all Indians," Goyal said.

The verypurpose of releasing draft rules is to elicit public opinion, ideas from other departments, from stakeholders, encourage feedback, he said, adding the government has always believed in engaging with all the stakeholders before taking a final decision on any policy. Citing example of data privacy law, national education policy and jewellery hallmarking norms, he said the government conducts stakeholders consultation to arrives at a good decision.

conducts state notices consultation to arrive at a good decision.

Domestic jewellers are now appreciating the hallmarking norms, which they were opposing earlier tooth and nail, he said.

"The consumer rules around the e-commerce are under public consultation. I warmly well-come, feedback from various."

come feedback from várious stakeholders but I have to prostakeholders but I have to pro-tect everybody's interest and balance consumers interest, ecommerce interests, retailers interests," he said, adding that "everybody's interest will be taken into consideration and a balanced and a very robust pol-icywill be finalised."

# Copper holds attractive future demand prospects

### KUNAL BOSE

ITWASA given that the closure of 400,000 tonne capacity smelter at coastal Thoothukudi by the Tamil Nadu government on grounds of violation of environmental norms in May 2018 would result in the country's import requirements of refined copper and also scrap for secondary production of red metal soaring. The owner of the benighted smelter Vedanta groups of a rhad no success in restarting the smelter even while it had promised environment friendly operation. So much being at stake, the aluminium to zinc to copper congomerate continues to engage with the government and the court to be enabled to restart the plant.

the plant.
The impact of Thoothukudi The impact of Thoothukudi plant shutdown was rudely felt during 2019-20 when as much as 45% of 750,000 tonue domestic copper demand had to be met by imports of 335,000 tonnes. Major operational dislocation in Indian metals sector perse and copper was no exception happened in 2020-21 in the wake of the Covid-19 pandemic related 2020-21 in the wake of the Covid-19 pandemic related lockdowns in the first two quarters in particular. Stalling of infinstructure projects, fall in production of automobiles and components thereof and setaken white goods output, all these combined to shrink coper downed by a whomeior per demand by a whopping 24% to 566,000 tonnes in the

24% to 566,000 tonnes in the ill-omened last year.
Copper being most sensitive to macroeconomic developments, the metal is still the best beliwether for the local as well as global economy. Last year, it once again faithfully reflected the pains the economy in general suffered. Incidentally, as local use of copper stratch by 184,000 tonous to shrank by 184,000 tonnes to 566,000 tonnes on a year-onyear basis, imports totalling 178,000 tonnes met 31% total

178,000 tonnes met 31% total demand.

The Indian copper industry had to contend with low demand of 118,000 tonnes in the first quarter of 2021-2.

compared with 161,000 tonnes in the first quarter of 2021-2.

a recent earnings call, Hindalo managing director Satish Pai said: "The demand is expected to improve steadily to a normalised level in the next few quarters due to declining Covid

Adani group, which has a rapidly expanding profile in solar and wind energy, ns to build a smelte 1 MT capacity at Mundra in Gujarat

cases and the phased unlocking in the country."

Beyond medium term by when the low base effect on current demand has worn thin, the use of copper in India is to see an annual growth rate of 8% or more enabled by rising demand from traditional sectors such electrical applications, building and construction and white goods such as air-conditioners, refrigerators and washing machines and also from growing official focus on decarbonising the economy. For example, as the country readies to progressively step up For example, as the country readies to progressively step up production of electrical vehicles (EVs), a major copper use area will open up. EVs will require five times more copper than vehicles made with internal combustion engine (ICE). A good amount of red metal will be used in making batteries for EVs, cables and charging stations.

ies for EVs, cables and charging stations.

Then as India pursues the target of achieving non-fossil tuel based energy resources constituting around 40% of cumulative electric power installed capacity, a major demand avenue for copper will open up. In the Indian basket of sustainable clean energy, solar nower will have pride of place sustainable clean energy; solar power will have pride of place since this tropical country has the potential to draw a vast amount of electricity from the blazing sun. The National Institute of Solar Energy estimates India's solar power potential at 748 gw. But the immediate target of prime minister's solar mission is to achieve a solar capacity of 100 gigavatt. The country seen as the fourth most attractive renewable energy market in the world is placed fifth in global solar power pecking order. But what does solar energy hold for copperuse? Alot since creation of 1 mw of solar cell capacity will need 6 tonnes of copper. Similarly, in renewable wind energy, considerable amount of copper is used in the generator, cabling and transformer of a turbine. Thus in view of the attractive future demand prospects for copper, at least two major Indian groups have shown keen interest in building large coast based smelters. Smelters

keen interest in building large coast based smelters. Smelters in India should ideally be located in coastal areas, for their operation will be entirely based on imported coppercon-centrate, the local availability of smelter feedstock being negli-gible. This cannot be otherwise since the country has only 0.31% of world copper ore reserves.

Naturally, it has a miniscule Naturally, it has a miniscuse share of 0.2% of global ore production. Against all this, India even at a low per capita use of 0.5 kg against global average of 3.1 kg accounts for around 3% of global copper consumption. What, however, obtains here is a stable against global.

3-1. Ig accounts for a found 3% of global copper consumption. What, however, obtains here is nothing unique.

Take China, which last year dwarfed all other copper producing countries by making 10,021 million tonnes (MT) of refined metal out of a world total of 2.3.3 MT had to import 21.77 MT of concentrate, 1.03 MT of unrefined copper such as blister, anode and ingots and 940,000 tonnes of scrap to feed its smelters, Japan, which runs the world's third largest copper smelting and refining industry with production of 1.6 MT in 220 is entirely dependent on metal in concentrate imports.

When recently Vedants sought expression of interest from state governments in hosting a 500,000 tonne smelter, the move was seen as a replacement for the shut smelter. Adamigroup, which has a rapidly expanding profile in solar and wind energy plans to build a much bigger smelter of MT capacity at Mundra in Guiarat. While 90% of Adami smelter capacity will be used to process concentrate, scrap will be the feedstock for remaining capacity.

### MG-NREGS data: Demand for work at 17-month low

According to the CMIE's data, employment in September 2021 was estimated to be at 406.2 million, the highest in 20

406.2 million, the highest in 20 months or since the Covid-19 shock in March 2020.

At the same time, the number of 'farmers' in the country fell from 116 million in August 2021 to 113.6 million in September 2021, asper CMIE. "This fall could imply a combination of two factors.

First, some salaried interpretations of the country of t

of two factors.

First, some salaried jobs
which were lost earlier have
been revived and some of the labour that migrated to the farms has come back to these salaried jobs. Second, economic activity is likely to have revived to absorb additional people in the form of daily wage labourers," and Mahesh Vyas, MD & CEO, CMIE, in a recent article.

CEO, CMIE, in a recent article.
According to the MGNREGS dashboard, generation
of person days under the
scheme this year till October 4
this fiscal stood at 202 crore
compared with 389.17 crore
recorded in the entire 2020-21.
Monthly person days genera-

tion of work also fell to a 17-

tion of work also fell to a 17-month low in September this year at a little over 18 crore. The data could see some revision in the coming days as pan-India compilation takes some time. The Centre had been generous with the allocations for the MG-NREGS (the scheme's budget outlay for the last fiscal year was ₹1.11 lakh crore RE compared with \$68,265 crore in 2019-20).

The Budget outlay for the

2019-20).

The Budget outlay for the scheme for 2021-22 is ₹73,000 crore. The government might have to allocate more fund to meet the need for the demand-driven scheme as the Centre has already released close to ₹58,597 crore to run the scheme

crore for un the scheme.

The scheme's mandate under the MGNREG Act, 2005, is to provide at least 1.00 days of wage employment' in a financial year to every rural household whose adult member volunteers to do unskilled manual work. However, an average of only 51.52 days of work were provided to such rural households in 200-21 and this year, so far, the figure is 35.

### on need for model builder-buyer

agreement
"West Bengal had enacted
an identical law like RERA, but
westruckit down as it failed the test of repugnancy," Justice Chandrachud said.

Chandrachud said.

However, the apex court refused to entertain some petitions filed by homebuyers who wanted adirection to the developers to compensate for the dealy in giving possession of their flats. The Bench said that these homebuyers can approach alternate fora like consumer courts for railed.

approach alternate for a like consumer courts for relief.

The apex court said, "Uniform builder-buyer agreement is required to be framed by the Centre to protect interests of lakhs of home buyers. This is an important issue on protection of buyers, of the put on back foot by clauses in agreements made by builders. Lits very important for consumer protection because builders try to put any number of clauses in the agreement which common people may not be aware of. It is important that this (model builder buyer agreement) is achieved in the country."

Senior counsel Vikas Singh

Senior counsel Vikas Singh and Menaka Guruswamy argued that the Real Estate and argued that the Real Estate and RegulatoryAuthorityAct, 2016, there should be a model agree-ment for States to adopt and the Centire was enjoined to frame a model agreement to ensure transparency, and fairness and to restrain builders and agents from indulging into unfair and restrictive trade practices. The absence of "model builder-buyer and agent-buyer" agreements across the country have been the main cause behind the fraud, lack of trans-parency, criminal conspiracies

and unfair and arbitrary trade practices in the real estate sector, they submitted

tor, they submitted.
Singh argued that not a singlestate had framed agreements to maintain transparency and there were many cases of deliberate delay in handing over possession. The police did not register First Information Reports on the complaints lodged by buyers, he said.

Builders issue revised delivery schedule again and again, adopted unfair prac-tices... All this amounts to cheating, conspiracy, criminal breach of trust, dishonestly inducing delivery of property, violation of corporate laws," Upadhyay said in his petition. The Jawvers told the SC that

Upadhyay sald in his petition.
The lawyers told the SC that
Section 4.1 of the RERA mandated the establishment of a
Central Advisory Council and
Section 4.2 says that the Council would ensure the implementation of the Act. However, the
ocut prima face said the RERA
did provide sufficient enabling
powers to the Council to make
Rules to prevent buyers from
being exploited.
Frame a model builderbuyer agreement and model
agent-buyer agreement to
infuse transparency, ensure fair
play, reduce frauds and deliberate delays, restrain
builders (mornters (aprets)

play, reduce frauds and deliberate delays, restrain builders/promoters/agents from indulging into arbitrary, unfair and restrictive trade practices and to protect the rights and interests of customers in the spirit of the RERA Act of 2016, the petitions said.

everybody's interest and come up with a robust framework in which this (policy) can be imple-mented in the interest of all Indi-

mentedin the interest of all Indians," Goyal said.

The very purpose of releasing draft rules is to elicit public opinion, ideas from other departments, from stakeholders, encourage feedback, he said, adding the government has always believed in engaging with all the stakeholders before takinga final decision on any policy. Citing example of data privacylaw, national education policy and jewellery hallmarking norms, he said the government conducts stakeholders consultation to arrive at a good decision. Domestic jewellers are now appreciating the hallmarking norms, which they were opposing earlier tooth and nail, he said. "The consumer rules around the e-commerce are under public consultation. I warmly welcome feedback from various stakeholders but I have to protect everybody's interest and balance consumers interest, retailers.

balance consumers interest, retailers interests," he said, adding that "everybody's interest will be taken into consideration and a balanced and a very robust policy will be finalised."

When asked if there is any move to link all the policies together, he said every department has to protect its own stakeholders.

### 'FB put profit before reining in hate speech'

Mile she believed no one at Facebook was "malevolent", she said the company had misaligned incentives.

Facebook published a statement disputting the points that Haugen made after the televised interview. "We continue to make significant improvements to tackle the spread of misinformation and harmful content;" said Facebook spokespertion and harmful content," said Facebook spokesperson Lena Pietsch. "To suggest we encourage bad content and do nothing is just not true."

# Copper holds attractive future demand prospects

ITWAS Agiven that the closure of 400,000 tonne capacity smelter at coastal Thoothukudi

smelter at coastal Thoothukudi by the Tamil Nadu government on grounds of violation of environmental norms in May 2018 would result in the country's import requirements of refined copper and also scrap for secondary production of redmad soaring. The owner of the benighted smelter Vedanta group so far had no success in restarting the smelter vedanta group so far had no success in restarting the smelter even while it had promised environment friendly operation. So much being at stake, the aluminium to zinc to copper conglomerate continues to engage with the government and the court to be enabled to restart the plant.

The impact of Thoothukudi plant shutdown was rudely felt during 2019–20 when as much as 45% of 750,000 tone domestic copper demand had to be met by imports of 335,000 tonnes. Major operational dislocation in Indian metals sector per send copper was no exception happened in 2020–21 in the wake of the Covid-19 pandemic related lockdowns in the first two quarters in particular. Stalling of infrastructure projects, fallin production of automobiles and components thereof and set-back in white goods output, all these combined to shrink copper demand by a whopping 24% to 566,000 tonnes in the ill-comend 110 memer 110 meme

24% to 566,000 tonnes in the ill-omened last year.

Copper being most sensitive to macroeconomic developments, the metal is still the best bellwether for the local as well as global economy. Last year, it once again faithfully reflected the pains the economy in general suffered. Incidentally, as local use of copper shrank by 184,000 tonnes to 566,000 tonnes on a year-onsear basis, imports totalling year basis, imports totalling 178,000 tonnes met 31% total

178,000 tonnes met 31% total demand.

The Indian copper industry had to contend with low demand of 118,000 tonnes in the first quarter of 2021-20 compared with 161,000 tonnes in the final three months of last year. However, at a recent earnings call, Hindalo managing director Satish Pai said: "The demand is expected oi improve steadily to a normalised level in the next few quarters due to declining Covid

Adani group, which has a rapidly expanding profile ns to build a smelte 1 MT capacity at Mundra in Gujarat

cases and the phased unlocking in the country."

Beyond medium term by when the low base effect on current demand has worn thin, the use of copper in India is to see an annual growth rate of 8% or more enabled by rising demand from traditional sections, building and construction and white goods such as air-conditioners, refrigerators and washing machines and also from growing official focus ondecarbonising the economy. For example, as the country readies to progressively step up For example, as the country readies to progressively step up production of electrical vehi-cles (EVs), a major copper use area will open up. EVs will require five times more copper than vehicles made with inter-nal combustion engine (ICE). A good amount of red metal will be used in making batter-ies for EVs, cables and charging stations

will be used in making batter-ies for EVs, cables and charging stations.

Then as India pursues the target of achieving non-fossil fuel based energy resources constituting around 40% of cumulative electric power installed capacity, a major demandavenue for copper will open up. In the Indian basket of sustainable clean energy, solar power will have pride of place since this tropical country has the potential to draw a vast amount of electricity from the lazing sun. The National Institute of Solar Energy estimates India's solar power protential at 748 gw. But the immediate target of prime minister's solar mission is to achieve a solar capacity of 100 gigawatt. The country seen as the fourth most attractive renewable energy market in the world is placed fifth in global solar power pecking order. But what

does solar energy hold for copperuse? A lot since creation of 1 mw of solar cell capacity will need 6 tonnes of copper. Similarly, in renewable wind energy, considerable amount of copper is used in the generator, cabling and transformer of a turbine. Thus in view of the attractive future demand prospects for copper, at least two major Indian groups have shown keen interest in building large coast based smelters. Smelters in India should ideally be located in coastal areas, for their operation will be entirely based on imported copper contheir operation will be entirely based on imported copper con-centrate, the local availability of smelter feedstock being negli-gible. This cannot be otherwise since the country has only 0.31% of world copper ore reserves.

Naturally, it has a miniscule Naturally, it has a miniscule share of 0.2% of global ore production. Against all this, India even at a low per capita use of 0.5 kg against global average of 3.1 kg accounts for around 3% of global copper consumption. What, however, obtains here is nothing unique.

Take China, which last year dwarfed all other copper producing countries by making 10.021 million tonnes (MT) of refined metal out of a world

10.021 million tonnes(MT) of refined metal out of a world total of 23.3 MT had to import 21.77 MT of concentrate, 1.03 MT of unrefined copper such as blister, anode and ingots and 940,000 tonnes of scrap to feed its smelters. Japan, which runs the world's third largest copper smelting and refining industry with production of

copper smelting and refining industry with production of 1.6 MT in 2020 is entirely dependent on metal in concentrate imports.

When recently Vedanta sought expression of interest from state governments in hosting a 500,000 tonne smelter, the move was seen as a male semant for the solution. smelter, the move was seen as a replacement for the shut smelter. Adami group, which has a rapidly expanding profile in solar and wind energy plans to build a much bigger smelter of 1. MT capacity at Mundra in Gujarat. While 90% of Adami smelter capacity will be used to process concentrate, scrap will be the feedstock for remaining the contractions of the contraction of t

### MG-NREGS data: Demand for work at 17-month low

According to the CMIE's data, employment in September 2021 was estimated to beat 406.2 million, the highest in 20 months or since the Covid-19 shock in March 2020.

At the same time 1.

At the same time, the number of 'farmers' in the country fell from 116 million in August 2021 to 113.6 million in Sep-

2021 to 113.6 million in September 2021, asper CMIE. This fall could imply a combination of two factors.

First, some salaried jobs which were lost earlier have been revived and some of the labour that migrated to the labour that migrated to the farms has come back to these salaried jobs. Second, economic activity is likely to have revived to absorb additional people in the form of daily wage labourers,'s aid Mahesh Vyas, MD & CEO, CMIE, in a recent article.

According to the MG-NREGS dashboard, generation of person days under the scheme this year till October 4 this fiscal stood at 202 crore compared with 389.17 crore compared with 389.17 crore recorded in the entire 2020-21. Monthly person days genera-

recorded in the entire 2020 22. Monthly person days genera-

tion of work also fell to a 17-month low in September this year at alittle over 18 crore. The data could see some revision in the coming days as pan-India compilation takes some time. The Centre had been generous with the allocations for the MG-NREGS (the scheme's budget outlay for the last fiscal year was ₹1.11 lath crore RE compared with ₹68,265 crore in 2019-20).

The Budget outlay for the scheme for 2021-22 is ₹73,000

scheme for 2021-22 is Y73,000 crore. The government might have to allocate more fund to meet the need for the demand-driven scheme as the Centre has alreadyreleased close to ₹58,97 crore to run the scheme.

The scheme's mandate under the MGRIEG Act, 2005, isto provide at least 100 days of wage employment' in a financial year to every rural household whose adult member volunteers to do unskilled manual work. However, an average of only 51.52 days of work were provided to such rural households in 200-21 and this year, so far, the figure is 35.

### Real estate projects: Apex court stresses

### AUTHUM INVESTMENT & INFRASTRUCTURE LIMITED

NOTICE OF RECORD DATE

# From the Front Page

### on need for model builder-buyer agreement

agreement

"West Bengal had enacted
an identical law like RERA, but
westruckit downasit failed the
test of repugnancy," Justice
Chandrachud said.
However, the apex court
refused to entertain some petitions filed by homebuyers who
wanted a direction to the develmers, to compensate for the

opers to compensate for the opers to compensate for the delay in giving possession of their flats. The Bench said that these homebuyers can approach alternate fora like consumer courts for relief. The apex court said, "Uni-form builder-buyer agreement is required to be framed by the Centre to protect interests of

is required to be framed by the Centre to protect interests of lakhs of home buyers. This is an important issue on protection ofbuyers, often put on back foot by clauses in agreements made bybuilders. Lits very important for consumer protection because builders try to put any number of clauses in the agreement which common people may not be aware of. It is important that this (model builder buyeragreement) is achieved in buyer agreement) is achieved in

the country." Senior counsel Vikas Singh Senior counsel Vikas Singh and Menaka Guruswamy argued that the Real Estate and Regulatory Authority Act, 2016, there should be a model agreement for Statesto adopt and the Centre was enjoined to frame a model agreement to ensure transparency, and fairness and to restrain builders and agents from indulging into unfair and

to restrain builders and agents from indulging into unfair and restrictive trade practices.

The absence of "model builder-buyer and agent-buyer agreements across the country have been the main cause behind the fraud, lack of transparency, criminal conspiracies

and unfair and arbitrary trade practices in the real estate sector, they submitted.

tor, they submitted.
Singh argued that not a single state had framed agreements to maintain transparency and there were many cases of deliberate delay in handing over possesion. The police did not register First Information Reports on the complaints lodged bybuyers, he said.

Builders issue revised delivery schedule again and again, adopted unfair practices.. All this amounts to cheating, conspiracy, criminal

tices... All this amounts to cheating, conspiracy, criminal breach of trust, dishonestly inducing delivery of property, violation of corporate laws, Upadhays asid in his petition. The lawyers told the SC that Section 41 of the RERA man-dated the establishment of a Central Advisory Council and Section 42 says that the Coun-cil would ensure the implemen-

Section 42 says that the Councilvouldensure the implementation of the Act. However, the cour prima facie said the RERA did provide sufficient enabling powers to the Council to make Rules to prevent buyers from being exploited.

Frame a model builder-buyer agreement and model agent-buyer agreement to infuse transparency, ensure fair layer, educe frauds and deliber-layer, educe frauds and deliber-layer, educe frauds and deliber-

play, reduce frauds and deliber play, reduce frauds and deliberate delays, restrain builders/promoters/agents from indulging into arbitrary, unfair and restrictive trade practices and to protect the rights and interests of customers in the spirit of the RERA Act of 2016, the petitions said.

### Invesco urges NCLT to order Zee EGM

"I do believe that I welcome all the feedback and look for-ward to a very robust and healthy consultations with all the stake-holders...We are trying to balance

everybody's interest and come up with a robust framework in which this (policy) can be imple-mented in the interest of all Indians,"Goval said.

ans, Goyal said.

The very purpose of releasing draft rules is to elicit public opinion, ideas from other departments, from stakeholders, encourage feedback, he said, adding the government has always believed in engaging with all the stakeholders before taking final decisions are with the said and the stakeholders before taking final decisions are sufficiently as a sufficient of the said and the said and

all the stakeholders before tak-ing a final decision on any policy. Citing example of data pri-vacy law, national education pol-icy and jewellery hallmarking norms, he said the government conducts stakeholders consulta-tion to arrive at a good decision. Domestic jewellers are now appreciating the hallmarking norms, which they were oppos-ing earlier tooth and nail, he said. "The consumer rules around the e-commerce are under rub-

"The consumer rules around the e-commerce are under public consultation. I warmly well-come feedback from various stakeholders but I have to protect everybody's interest and balance consumers interest, ecommerce interests, retailers interests," he said, adding that "everybody's interest will be taken into consideration and a balanced and a wear receiver." balanced and a very robust pol-icy will be finalised."

When asked if there is any move to link all the policies together, he said every depart-ment has to protect its own stakeholders.

### 'FB put profit before reining in hate speech'

While she believed no one at Facebook was "malevolent", she said the company had misaligned incentives. Facebook published a statement disputing the points that Haugen made after the televised interview. "We continue to make significant improvements to tackle the sure add for mishirocklea.

the spread of misinforma tion and harmful content, tion and harmful content," said Facebook spokesper-son Lena Pietsch. "To sug-gest we encourage bad content and do nothing is just not true." Ahead of the 60 Minutes interview, Facebook Vice President of global affairs NickClegsaidon CNN itwas "Judicrous"

# Copper holds attractive future demand prospects

ITWASA given that the closure of 400,000 tonne capacity smelter at coastal Thoothukudi by the Tamil Nadu government on grounds of violation of environmental norms in May 2018 would result in the country's import requirements of refined copper and also scrap for sec-ondary production of red metal ondary production of red metal soaring. The owner of the benighted smelter Vedanta group so far had no success in restarting the smelter even while it had promised environment friendly operation. So much being at stake, the aluninum to lien to copper conglomerate continues to engage with the government and the court to be enabled to restart the plant.

the plant.

The impact of Thoothukudi plant shutdown was rudely felt during 2019-20 when as much as 45% of 750,000 tonne domestic copper demand had to be met by imports of 335,000 tonnes. Major operational dislocation in Indian metals sector perse and copper metals sector press and copper tional dislocation in Indian metal sector perse and copper was no exception happened in 2020-21 in the wake of the Covid-19 pandemic related lockdowns in the first two quarters in particular. Stalling of infrastructure projects, fall in production of automobiles and components thereof and sethesically of the components of the production of such with the combined to shrink copper demand by a whopping 2496 to 566,000 tonnes in the ill-omened last year.

24% to 566,000 tonnes in the ill-omeed fast year.

Copper being most sensitive to macroeconomic developments, the metal is still the best beliwether for the local as well as global economy. Last year, it once again faithfully reflected the pains the economy in general suffered. Incidentally, as local use of coppes shrank by 184,000 tonnes to 566,000 tonnes on a year-onyear basis, imports totalling year basis, imports totalling 178,000 tonnes met 31% total

178,000 tonnes met 31% total demand.

The Indian copper industry had to contend with low demand of 118,000 tonnes in the first quarter of 2021-22 compared with 161,000 tonnes in the final three months of lastyear. However, at a recent earnings call, Hindalco managing director Satish Pai said: "The demand is expected to improve steadily to a normalised level in the next few quarters due to declining Covid

Adani group, which has a rapidly expanding profile in solar and wind energy, plans to build a smelter of 1 MT capacity at Mundra in Gujarat

cases and the phased unlocking

cases and the phased unlocking in the country."

Beyond medium term by when the low base effect on current demand has worn thin, the use of copper in India is to see an annual growth rate of 8% or more enabled by rising demand from traditional sectors such electrical applications, building and construction and white goods such as air-conditioners, refrigerators and washing machines and air-conditioners, refrigerators and washing machines and also from growing official focus on decarbonising the economy. For example, as the country readies to progressively step up production of electrical vehicles (EVs), a major copper use area will open up. EVs will require five times more copper than vehicles made with internal combustion engine (ICE). A good amount of red metal will be used in making batteries for EVs, cables and charging stations.

ies for EVs, cables and charging stations.

Then as India pursues the target of achieving non-fossil fuel based energy resources constituting around 40% of cumulative electric power installed capacity, a major demand avenue for copper will open up. In the Indian basket of sustainable clean energy, solar open up. In the Indian basket of sustainable clean energy, solar power will have pride of place since this tropical country has the potential to draw a vast amount of electricity from the blazing sun. The National Institute of Solar Energy estimates India's solar power potential at 748 gw. But the immediate target of prime minister's solar mission is to achieve a solar capacity of 100 gigawatt. The mission is to achieve a solar capacity of 100 gigawatt. The country seen as the fourth most attractive renewable energy market in the world is placed fifth in global solar power pecking order. But what

does solar energy hold for copdoes solar energy hold for cop-peruse? Alot since creation of 1 mw of solar cell capacity will need 6 tonnes of copper, Simi-larly, in renewable wind energy, considerable amount of copper is used in the generator, cabling and transformer of a turbine. Thus in view of the attrac-tive future demand prospects for copper, at least two major Indian groups have shown

for copper, at least two major Indian groups have shown keen interest in building large coast based smelters. Smelters in India should ideally be located in coastal areas, for their operation will be entirely based on imported coppercon-centrate, the local availability of malter featers their and proper consmelter feedstock being negli-gible. This cannot be otherwise since the country has only 0.31% of world copper ore

reserves. Naturally, it has a miniscule Naturally, Inta a liminst con-share of 0.2% of global ore pro-duction. Against all this, India even at a low per capita use of 0.5 kg against global average of 3.1 kg accounts for around 3% of global copper consumption. What, however, obtains here is parthinguring.

of global copper consumption. What, however, obtains here is nothing unique.

Take China, which last year dwarfed all other copper producing countries by making 10,021 million tonnes (MT) of refined metal out of a world dutal of 23.3 MT had to import 21.77 MT of concentrate, 1.03 MT of unrefined copper such as blister, anode and ingots and 940,000 tonnes of scrap to feed its smelters, lapan, which runs the world's third largest copper smelting and refining industry with production of 1.6 MT in 2020 is entirely dependent on metal in concentrate imports.

When recently Vedants ought expression of interest from state governments in hosting a 500,000 tonne smelter, themove was seen as a rapidly expanding profile in solar and wind energy plans to build a much bigger smelter of 1 MT capacity at Mundra in Gujarat. While 90% of Adani melter capacity will be used to process concentrate, scrap will be the feedstock for remaining capacity.

### MG-NREGS data: Demand for work at 17-month low

According to the CMIE's data, employment in September 2021 was estimated to be at 406.2 million, the highest in 20 months or since the Covid-19 shock in March 2020.

AT MARCH 2020.

At the same time, the number of 'farmers' in the country fell from 116 million in August 2021 to 113.6 million in September 2021,asper CMIE. "This fall could imply a combination of two factors.

First, some calculations."

of two factors.

First, some salaried jobs
which were lost earlier have
been revived and some of the labour that migrated to the farms has come back to these salaried jobs. Second, economic activity is likely to have revived to absorb additional people in the form of daily wage labourers," asid Mahesh Vyas, MD & CEO, CMIE, in a recent article.

CEO, CMIE, in a recent article.
According to the MGNREGS dashboard, generation
of person days under the
scheme this year till October 4
this fiscal stood at 202 crore
compared with 389.17 crore
recorded in the entire 2020-21.
Monthly person days genera-

tion of work also fell to a 17-

tion of work also fell to a 17-month low in September this year at a little over 18 crore. The data could see some revision in the coming days as pan-India compilation takes some time. The Centre had been generous with the allocations for the MG-NREGS (the scheme's budget outlay for the last fiscal year was ₹1.11 lakh crore RE compared with \$68,265 crore in 2019-20).

The Budget outlay for the

2019-20).

The Budget outlay for the scheme for 2021-22 is ₹73,000 crore. The government might have to allocate more fund to meet the need for the demand-driven scheme as the Centre has already released close to ₹58,597 crore to run the scheme

crore for un the scheme.

The scheme's mandate under the MGNREG Act, 2005, is to provide at least 1.00 days of wage employment' in a financial year to every rural household whose adult member volunteers to do unskilled manual work. However, an average of only 51.52 days of work were provided to such rural households in 200-21 and this year, so far, the figure is 35.

### on need for model builder-buyer

agreement
"West Bengal had enacted
an identical law like RERA, but
westruckit down as it failed the test of repugnancy," Justice Chandrachud said.

Chandrachud said.

However, the apex court refused to entertain some petitions filed by homebuyers who wanted adirection to the developers to compensate for the delay in giving possession of their flats. The Bench said that these homebuyers can approach alternate fora like consumer courts for railed.

approach alternate for a like consumer courts for relief.

The apex court said, "Uniform builder-buyer agreement is required to be framed by the Centre to protect interests of lakhs of home buyers. This is an important issue on protection of buyers, often put on back foot by clauses in agreements made by builders. Lits very important for consumer protection because builders try to put any number of clauses in the agreement which common people may not be aware of. It is important that this (model builder buyer agreement) is achieved in the country."

Senior counsel Vikas Singh

Senior counsel Vikas Singh and Menaka Guruswamy argued that the Real Estate and argued that the Real Estate and RegulatoryAuthorityAct, 2016, there should be a model agree-ment for States to adopt and the Centire was enjoined to frame a model agreement to ensure transparency, and fairness and to restrain builders and agents from including into unfair and restrictive trade practices. The absence of "model builder-buyer and agent-buyer" agreements across the country have been the main cause behind the fraud, lack of trans-parency, criminal conspiracies

and unfair and arbitrary trade practices in the real estate sector, they submitted

tor, they submitted.
Singh argued that not a singlestate had framed agreements to maintain transparency and there were many cases of deliberate delay in handing over possession. The police did not register First Information Reports on the complaints lodged by buyers, he said.

Builders issue revised delivery schedule again and again, adopted unfair prac-tices... All this amounts to cheating, conspiracy, criminal breach of trust, dishonestly inducing delivery of property, violation of corporate laws," Upadhyay said in his petition. The Jawvers told the SC that

Upadhyay sald in his petition.
The lawyers told the SC that
Section 4.1 of the RERA mandated the establishment of a
Central Advisory Council and
Section 4.2 says that the Council would ensure the implementation of the Act. However, the
ocurt prima face said the RERA
did provide sufficient enabling
powers to the Council to make
Rules to prevent buyers from
being exploited.
Frame a model builderbuyer agreement and model
agent-buyer agreement to
infuse transparency, ensure fair
play, reduce frauds and deliberate delays, restrain
builders (mornters (agent)

ate delays, restrain builders/promoters/agents from indulging into arbitrary, unfair and restrictive trade practices and to protect the rights and interests of cus-tomers in the spirit of the RERA Act of 2016, the petitions said.

### Invesco urges NCLT to order Zee EGM

"I do believe that I welcome all the feedback and look for-ward to avery robust and healthy consultations with all the stake-holders...We are trying to balance

everybody's interest and come up with a robust framework in which this (policy) can be imple-mented in the interest of all Indi-

mentedin theinterestorial Indi-ans, Coyal salones of releasing fraft rules is to elicit publicopin-ion, ideas from other depart-ments, from stakeholders, encourage feedback, he said, adding the government has always believed in engaging with all the stakeholders before tak-ing a final decision on any policy. Citing example of data pri-vacylawn attonal education pol-icy and jewellery hallmarking norms, he said the government conducts takeholders consulta-tion to arrives at a good decision. Domestic jewellers are now appreciating the hallmarking

Domestic jewellers are now appreciating the hallmarking norms, which they were opposing earlier tooth and nail, he said. "The consumer rules around thee-commerce are under public consultation. It warmly well-come feedback from various stakeholders but I have to protect everybody's interest and balance consumers interest. balance consumers interest, retailers interests," he said, adding that "everybody's interest will be taken into consideration and a balanced and a very robust policy will be finalised."

When asked if there is any move to link all the policies together, he said every department has to protect its own stakeholders.

### 'FB put profit before reining in hate speech'

Mile she believed no one at Facebook was "malevolent", she said the company had misaligned incentives.

Facebook published a statement disputting the points that Haugen made after the televised interview. "We continue to make significant improvements to tackle the spread of misinformation and harmful content;" said Facebook spokespertion and harmful content," said Facebook spokesperson Lena Pietsch. "To suggest we encourage bad content and do nothing is just not true."

Ahead of the 60 Minutes interview, Facebook Vice President of global affairs NickClegsaidonCNNitwas NickClegsaidonCNNitwas Tudicrous"

# Copper holds attractive future demand prospects

ITWAS Agiven that the closure of 400,000 tonne capacity smelter at coastal Thoothukudi

smeter at coastal I hoothukudi bythe Tamil Nadu government on grounds of violation of environmental norms in May 2018 would result in the country's import requirements of refined copper and also scrap for secondary production of redmad soaring. The owner of the benighted smelter Vedanta group so far had no success in restarting the smelter even while it had promised environment friendly operation. So much being at stake, the aluminium to zinc to copper components of the court to be enabled to restart the plant.

The impact of Thoothukudi plant shutdown was rudely felt during 2019–20 when as much as 45% of 750,000 tome domestic copper demand had to be met by imports of 335,000 tomes. Major operational dislocation in Indian metals sector per send copper was no exception happened in 2020–21 in the wake of the Covid-19 pandemic related lockdowns in the first two quarters in particular. Stalling of infrastructure projects, fallin production of automobiles and components thereof and set-back in white goods output, all these combined to shrink copper demand by a whopping 24% to 566,000 tonnes in the ill-compend 110 memer 110

24% to 566,000 tonnes in the ill-omened last year.

Copper being most sensitive to macroeconomic developments, the metal is still the best bellwether for the local as well as global economy. Last year, it once again faithfully reflected the pains the economy in general suffered. Incidentally, as local use of copper shrank by 184,000 tonnes to 566,000 tonnes on a year-onsear basis, imports totalling year basis, imports totalling 178,000 tonnes met 31% total

178,000 tonnes met 31% total demand.

The Indian copper industry had to contend with low demand of 118,000 tonnes in the first quarter of 2021-20 compared with 161,000 tonnes in the final three months of last year. However, at a recent earnings call, Hindalo managing director Satish Pai said: "The demand is expected oi improve steadily to a normalised level in the next few quarters due to declining Covid

General Manager (Contracts)

Har Ek Kaam Desh Ke Naam / ISPATI IRADA

Adani group, which has a rapidly expanding profile ns to build a smelte 1 MT capacity at Mundra in Gujarat

cases and the phased unlocking in the country."

Beyond medium term by when the low base effect on current demand has worn thin, the use of copper in India is to see an annual growth rate of 8% or more enabled by rising demand from traditional sections, building and construction and white goods such as air-conditioners, refrigerators and washing machines and also from growing official focus ondecarbonising the economy. For example, as the country readies to progressively step up For example, as the country readies to progressively step up production of electrical vehi-cles (EVs), a major copper use area will open up. EVs will require five times more copper than vehicles made with inter-nal combustion engine (ICE). A good amount of red metal will be used in making batter-ies for EVs, cables and charging stations

will be used in making batter-ies for EVs, cables and charging stations.

Then as India pursues the target of achieving non-fossil fuel based energy resources constituting around 40% of cumulative electric power installed capacity, a major demandavenue for copper will open up. In the Indian basket of sustainable clean energy, solar power will have pride of place since this tropical country has the potential to draw a vast amount of electricity from the lazing sun. The National Institute of Solar Energy estimates India's solar power protential at 748 gw. But the immediate target of prime minister's solar mission is to achieve a solar capacity of 100 gigawatt. The country seen as the fourth most attractive renewable energy market in the world is placed fifth in global solar power pecking order. But what

does solar energy hold for copperuse? Alot since creation of 1 mw of solar cell capacity will need of tonnes of copper. Similarly, in renewable wind energy, considerable amount of copper is used in the generator, cabling and transformer of a turbine.

Thus in view of the attractive future demand prospects for copper, at least two major Indian groups have shown keen interest in building large coast based smelters. Smelters in India should ideally be located in coastal areas, for located in coastal areas, for their operation will be entirely their operation will be entirely based on imported copper con-centrate, the local availability of smelter feedstock being negli-gible. This cannot be otherwise since the country has only 0.31% of world copper ore reserves.

Naturally, it has a miniscule Naturally, it has a miniscule share of 0.2% of global ore production. Against all this, India even at a low per capita use of 0.5 kg against global average of 3.1 kg accounts for around 3% of global copper consumption. What, however, obtains here is nothing unique.

Take China, which last year dwarfed all other copper producing countries by making 10.021 million tonnes (MT) of refined metal out of a world

10.021 million tonnes(MT) of refined metal out of a world total of 23.3 MT had to import 21.77 MT of concentrate, 1.03 MT of unrefined copper such as blister, anode and ingots and 940,000 tonnes of scrap to feed its smelters. Japan, which runs the world's third largest copper smelting and refining industry with production of

copper smelting and refining industry with production of 1.6 MT in 2020 is entirely dependent on metal in concentrate imports.

When recently Vedanta sought expression of interest from state governments in hosting a 500,000 tonne smelter, the move was seen as a malacament for the other smelter, the move was seen as a replacement for the shut smelter. Adami group, which has a rapidly expanding profile in solar and wind energy plans to build a much bigger smelter of 1. MT capacity at Mundra in Gujarat. While 90% of Adami smelter capacity will be used to process concentrate, scrap will be the feedstock for remaining the capacity of the capacity of

### MG-NREGS data: Demand for work at 17-month low

According to the CMIE's data, employment in September 2021 was estimated to be at 406.2 million, the highest in 20

406.2 million, the highest in 20 months or since the Covid-19 shock in March 2020.
At the same time, the number of "farmers" in the country fell from 116 million in August 2021 to 113.6 million in September 2021, asper CMIE. "This fall could imply a combination of two factors.

Eigst some salaried jobs

of two factors.

First, some salaried jobs
which were lost earlier have
been revived and some of the labour that migrated to the farms has come back to these salaried jobs. Second, economic activity is likely to have revived to absorb additional people in the form of daily wage labourers," said Mahesh Vyas, MD & CEO, CMIE, in a recent article.

CEO, CMIE, in a recent article.
According to the MGNREGS dashboard, generation
of person days under the
scheme this year till October 4
this fiscal stood at 202 crore
compared with 389.17 crore
recorded in the entire 2020-21.
Monthly person days genera-

tion of work also fell to a 17-

tion of work also fell to a 17-month low in September this year at a little over 18 crore. The data could see some revision in the coming days as pan-India compilation takes some time. The Centre had been generous with the allocations for the MG-NREGS (the scheme's budget outlay for the last fiscal year was ₹1.11 lakh crore RE compared with \$68,265 crore in 2019-20).

The Budget outlay for the

2019-20).

The Budget outlay for the scheme for 2021-22 is ₹73,000 crore. The government might have to allocate more fund to meet the need for the demand-driven scheme as the Centre has already released close to ₹58,597 crore to run the scheme

crore for un the scheme.

The scheme's mandate under the MGNREG Act, 2005, is to provide at least 1.00 days of wage employment' in a financial year to every rural household whose adult member volunteers to do unskilled manual work. However, an average of only 51.52 days of work were provided to such rural households in 200-21 and this year, so far, the figure is 35.

Date: 4th October, 2021

Sdi-Hitesh Vora Company Secretary and Compliance Officer

### on need for model builder-buyer

agreement
"West Bengal had enacted
an identical law like RERA, but
westruckit down as it failed the test of repugnancy," Justice Chandrachud said.

Chandrachud said.

However, the apex court refused to entertain some petitions filed by homebuyers who wanted adirection to the developers to compensate for the dealy in giving possession of their flats. The Bench said that these homebuyers can approach alternate fora like consumer courts for railed.

approach alternate for a like consumer courts for relief.

The apex court said, "Uniform builder-buyer agreement is required to be framed by the Centre to protect interests of lakhs of home buyers. This is an important issue on protection of buyers, of the put on back foot by clauses in agreements made by builders. Lits very important for consumer protection because builders try to put any number of clauses in the agreement which common people may not be aware of. It is important that this (model builder buyer agreement) is achieved in the country."

Senior counsel Vikas Singh

Senior counsel Vikas Singh and Menaka Guruswamy argued that the Real Estate and argued that the Real Estate and Regulatory Authority Act, 2016, there should be a model agreement for States to adopt and the Centre was enjoined to frame a model agreement to ensure transparency, and fairness and to restrain builders and agents from indulging into unfair and restrictive trade practices.

The absence of "model

restrictive trade practices.

The absence of "model builder-buyer and agent-buyer" agreements across the country have been the main cause behind the fraud, lack of transparency, criminal conspiracies

and unfair and arbitrary trade practices in the real estate sector, they submitted

tor, they submitted.
Singh argued that not a singlestate had framed agreements to maintain transparency and there were many cases of deliberate delay in handing over possession. The police did not register First Information Reports on the complaints lodged by buyers, he said.

Builders issue revised delivery schedule again and again, adopted unfair prac-tices... All this amounts to cheating, conspiracy, criminal breach of trust, dishonestly inducing delivery of property, violation of corporate laws," Upadhyay said in his petition. The lawwers told the SC that

Upadhyay sald in his petition.
The lawyers told the SC that
Section 4.1 of the RERA mandated the establishment of a
Central Advisory Council and
Section 4.2 says that the Council would ensure the implementation of the Act. However, the
ocurt prima face said the RERA
did provide sufficient enabling
powers to the Council to make
Rules to prevent buyers from
being exploited.
Frame a model builderbuyer agreement and model
agent-buyer agreement to
infuse transparency, ensure fair
play, reduce frauds and deliberate delays, restrain
builders (mornters (agent)

play, reduce frauds and deliberate delays, restrain builders/promoters/agents from indulging into arbitrary, unfair and restrictive trade practices and to protect the rights and interests of customers in the spirit of the RERA Act of 2016, the petitions said.

### Invesco urges NCLT to order Zee EGM

"I do believe that I welcome all the feedback and look for-ward to avery robust and healthy consultations with all the stake-holders...We are trying to balance

everybody's interest and come up with a robust framework in which this (policy) can be imple-mented in the interest of all Indi-

mentedin the interest of all indi-ans, "Goyal salones of releasing fart furles is to elicit public opin-ion, ideas from other depart-ments, from stakeholders, encourage feedback, he said, adding the government has always believed in engaging with all the stakeholders before tak-ing a final decision on any policy. Citing example of data pri-vacy law national education poli-icy and jewellery hallmarking norms, he said the government conducts takeholders consulta-tion to arrive at a good decision. Domestic jewellers are now appreciating the hallmarking

Domestic jewellers are now appreciating the hallmarking norms, which they were opposing earlier tooth and nail, he said. "The consumer rules around thee-commerce are under public consultation. It warmly well-come feedback from various stakeholders but I have to protect everybody's interest and balance consumers interest, balance consumers interest, retailers interests," he said, adding that "everybody's interest will be taken into consideration and a balanced and a very robust policy will be finalised."

When asked if there is any move to link all the policies together, he said every department has to protect its own stakeholders.

### 'FB put profit before reining in hate speech'

Mile she believed no one at Facebook was "malevolent", she said the company had misaligned incentives.

# Copper holds attractive future demand prospects

ITWAS A given that the closure of 400,000 tonne capacity smelter at coastal Thoothukudi

smelter at coastal Thoothukudi whethe Tamil Nadu government on grounds of violation of environmental norms in May 2018 would result in the country's import requirements of refined copper and also scrap for secondary production of red metal soaring. The owner of the benighted smelter Vedanta group so far had no success in restarting the smelter vedanta group so far had no success in restarting the smelter even while it had promised environment friendly operation. So much being at stake, the aluninum to zinc to copper component friendly operation. So much being at stake, the aluninum to zinc to copper component friendly operation. So much being at stake, the aluninum to zinc to copper component for 50,000 tonned some state of 535,000 tonnes and set on the court to be enabled to restart the plant.

The impact of Thoothukudi plant shutdown was rudely felt during 2019-20 when as much observed to the court of 535,000 tonnes and septional dislocation in Indian metals sector per se and copper was no exception happened in 2020-21 in the wake of the covid-19 pandemic related lockdowns in the first two quarters in particular. Stalling of infrastructure projects, fall in production of automobiles and components thereof and setback in white goods output, all these combined to shrink copper demand by a whopping 24% to 565,000 tonnes in the

24% to 566,000 tonnes in the ill-omened last year.

Copper being most sensitive to macroeconomic developments, the metal is still the best bellwether for the local as well as global economy. Last year, it once again faithfully reflected the pains the economy in general suffered. Incidentally, as local use of copper shrank by 184,000 tonnes to 566,000 tonnes on a year-onsear basis, imports totalling year basis, imports totalling 178,000 tonnes met 31% total

178,000 tonnes met 31% total demand.

The Indian copper industry had to contend with low demand of 118,000 tonnes in the first quarter of 2021-20 compared with 161,000 tonnes in the final three months of last year. However, at a recent earnings call, Hindalo managing director Satish Pai said: "The demand is expected oi improve steadily to a normalised level in the next few quarters due to declining Covid

General Manager (Contracts)

Har Ek Kaam Desh Ke Naam / ISPATI IRADA

Adani group, which has a rapidly expanding profile ns to build a smelte 1 MT capacity at Mundra in Gujarat

cases and the phased unlocking in the country."

Beyond medium term by when the low base effect on current demand has worn thin, the use of copper in India is to see an annual growth rate of 8% or more enabled by rising demand from traditional sectors, suidifing and construction and white goods such as air-conditioners, refrigerators and washing machines and also from growing official focus ondecarbonising the economy. For example, as the country readies to progressively step up For example, as the country readies to progressively step up production of electrical vehi-cles (EVs), a major copper use area will open up. EVs will require five times more copper than vehicles made with inter-nal combustion engine (ICE). A good amount of red metal will be used in making batter-ies for EVs, cables and charging stations

ies for EVs, cables and charging stations.

Then as India pursues the target of achieving non-fossil fuel based energy resources constituting around 40% of cumulative electric power installed capacity, a major demand avenue for copper will open up. In the Indian basket of sustainable clean energy, solar open up. In the Indian basket of sustainable clean energy, solar power will have pride of place since this tropical country has the potential to draw a vast amount of electricity from the loazing sun. The National Institute of Solar Energy estimates India's solar power potential at 748 gw. But the immediate target of prime minister's solar mission is to achieve a solar capacity of 100 gigawatt. The country seen as the fourth most attractive renewable energy market in the world is placed fifth in global solar power pecking order. But what

does solar energy hold for copperuse? Alot since creation of 1 mw of solar cell capacity will need of tonnes of copper. Similarly, in renewable wind energy, considerable amount of copper is used in the generator, cabling and transformer of a turbine.

Thus in view of the attractive future demand prospects for copper, at least two major Indian groups have shown keen interest in building large coast based smelters. Smelters in India should ideally be located in coastal areas, for located in coastal areas, for their operation will be entirely their operation will be entirely based on imported copper con-centrate, the local availability of smelter feedstock being negli-gible. This cannot be otherwise since the country has only 0.31% of world copper ore reserves.

Naturally, it has a miniscule Naturally, it has a miniscule share of 0.2% of global ore production. Against all this, India even at a low per capita use of 0.5 kg against global average of 3.1 kg accounts for around 3% of global copper consumption. What, however, obtains here is nothing unique.

Take China, which last year dwarfed all other copper producing countries by making 10.021 million tonnes (MT) of refined metal out of a world

10.021 million tonnes(MT) of refined metal out of a world total of 23.3 MT had to import 21.77 MT of concentrate, 1.03 MT of unrefined copper such as blister, anode and ingots and 940,000 tonnes of scrap to feed its smelters. Japan, which runs the world's third largest copper smelting and refining industry with production of

copper smelting and refining industry with production of 1.6 MT in 2020 is entirely dependent on metal in concentrate imports.

When recently Vedanta sought expression of interest from state governments in hosting a 500,000 tonne smelter, the move was seen as a malacament for the other smelter, the move was seen as a replacement for the shut smelter. Adami group, which has a rapidly expanding profile in solar and wind energy plans to build a much bigger smelter of 1. MT capacity at Mundra in Gujarat. While 90% of Adami smelter capacity will be used to process concentrate, scrap will be the feedstock for remaining the capacity of the capacity of

### MG-NREGS data: Demand for work at 17-month low

According to the CMIE's data, employment in September 2021 was estimated to be at 406.2 million, the highest in 20 months or since the Covid-19 shock in March 2020.

At the same time, the number of farmers' in the country left from 116 in million in August 2021 to 113.6 million in September 2013 was CMIE "This results of 100 million in March 200 million in September 2013 was CMIE "This results of 100 million in September 2013 was CMIE".

tember 2021, as per CMIE. "This fall could imply a combination

fall could imply a combination of two factors.

First, some salaried jobs which were lost earlier have been revived and some of the labour that migrated to the farms has come back to these salaried jobs. Second, economic activity is likely to have revived to absorb additional people in the form of daily wage labourers, said Mahesh Vyas, MD & CEO, CMIE, in a recent article.

According to the MG-NEGS dashboard, generation of person days under the scheme this yeart ill October 4 this fiscal stood at 202 crore compared with 389.17 crore recorded in the entire 2020-21.

ded in the entire 2020-21. Monthly person days generation of work also fell to a 17-month low in September this year at a little over 18 crore. The data could see some revision in the coming days as pan-India compilation takes some time.

The Centre had been gener-ous with the allocations for the MG-NREGS (the scheme's bud-

MG-NREGS (the scheme's bud-get outlay for the last fiscal year was ₹1.11 lakh crore RE com-pared with ₹68,265 crore in 2019-20.

The Budget outlay for the scheme for 2021-22 is ₹73,000 crore. The government might have to allocate more fund to meet the need for the demand-driven scheme as the Centre has already released close to ₹58,597 crore to run the scheme.

crore to run the scheme.

The scheme's mandate under the MGNREG Act, 2005, isto provide at least 100 days of wage employment' in a financial year to every rural household whose adult member volunteers to do unskilled manual work. However, an average of only 51.52 days of work were provided to such rural households in 200-21 and this year, so far, the figure is 35.

Major operational dislocation in Indian metals sector per se and copper was no exception happened in 2020-21 in the wake of the Covid-19 anademic related 2020-21 in the wake of the Covid-19 pandemic related lockdowns in the first two quarters in particular. Stalling of infinstructure projects, fall in production of automobiles and components thereof and setaken white goods output, all these combined to shrink coper downed by a whomeior per demand by a whopping 24% to 566,000 tonnes in the

24% to 566,000 tonnes in the ill-omened last year.
Copper being most sensitive to macroeconomic developments, the metal is still the best bellwether for the local as well as global economy. Last year, it once again faithfully reflected the pains the economy in general suffered. Incidentally, as local use of copper shrank by 184,000 tonnes to 566,000 tonnes on a year-onsear basis, imports totalling year basis, imports totalling 178,000 tonnes met 31% total

178,000 tonnes met 31% total demand.

The Indian copper industry had to contend with low demand of 118,000 tonnes in the first quarter of 2021-2.

compared with 161,000 tonnes in the first quarter of 2021-2.

a recent earnings call, Hindalo managing director Satish Pai said: "The demand is expected to improve steadily to a normalised level in the next few quarters due to declining Covid

Adani group, which has a rapidly expanding profile in solar and wind energy, ns to build a smelte 1 MT capacity at Mundra in Gujarat

cases and the phased unlocking in the country."

Beyond medium term by when the low base effect on current demand has worn thin, the use of copper in India is to see an annual growth rate of 8% or more enabled by rising demand from traditional sectors such electrical applications, building and construction and white goods such as air-conditioners, refrigerators and washing machines and also from growing official focus on decarbonising the economy. For example, as the country readies to progressively step up For example, as the country readies to progressively step up production of electrical vehicles (EVs), a major copper use area will open up. EVs will require five times more copper than vehicles made with internal combustion engine (ICE). A good amount of red metal will be used in making batteries for EVs, cables and charging stations.

ies for EVs, cables and charging stations.

Then as India pursues the target of achieving non-fossil tuel based energy resources constituting around 40% of cumulative electric power installed capacity, a major demand avenue for copper will open up. In the Indian basket of sustainable clean energy, solar nower will have pride of place sustainable clean energy, solar power will have pride of place since this tropical country has the potential to draw a wast amount of electricity from the blazing sun. The National Institute of Solar Energy estimates India's solar power potential at 748 gw. But the immediate target of prime minister's solar mission is to achieve a solar capacity of 100 gigawatt. The country seen as the fourth most attractive renewable energy market in the world is placed fifth in global solar power pecking order. But what does solar energy hold for copperuse? Alot since creation of 1 mw of solar cell capacity will need 6 tonnes of copper. Similarly, in renewable wind energy, considerable amount of copper is used in the generator, cabling and transformer of a turbine. Thus in view of the attractive future demand prospects for copper, at least two major Indian groups have shown keen interest in building large coast based smelters. Smelters

keen interest in building large coast based smelters. Smelters in India should ideally be located in coastal areas, for their operation will be entirely based on imported coppercon-centrate, the local availability of smelter feedstock being negli-gible. This cannot be otherwise since the country has only 0.31% of world copper ore reserves.

Naturally, it has a miniscule Naturally, it has a miniscuse share of 0.2% of global ore production. Against all this, India even at a low per capita use of 0.5 kg against global average of 3.1 kg accounts for around 3% of global copper consumption. What, however, obtains here is a stable against global.

3-1. Ig accounts for a found 3% of global copper consumption. What, however, obtains here is nothing unique.

Take China, which last year dwarfed all other copper producing countries by making 10,021 million tonnes (MT) of refined metal out of a world total of 2.3.3 MT had to import 21.77 MT of concentrate, 1.03 MT of unrefined copper such as blister, anode and ingots and 940,000 tonnes of scrap to feed its smelters, Japan, which runs the world's third largest copper smelting and refining industry with production of 1.6 MT in 220 is entirely dependent on metal in concentrate imports.

When recently Vedants sought expression of interest from state governments in hosting a 500,000 tonne smelter, the move was seen as a replacement for the shut smelter. Adamigroup, which has a rapidly expanding profile in solar and wind energy plans to build a much bigger smelter of MT capacity at Mundra in Guiarat. While 90% of Adami smelter capacity will be used to process concentrate, scrap will be the feedstock for remaining capacity.

### MG-NREGS data: Demand for work at

IOT WORK AT

17-month low

According to the CMIE's
data, employment in September 2021 was estimated to be at
406.2 million, the highest in 20
months or since the Covid-19
shock in March 2020.

At the same time, the morter of 'farmers' in the country
fell from 116 million in September 2021, asper CMIE'. This
fall could imply a combination
of two factors.

First, some salaried jobs

fall could imply a combination of two factors.

First, some salaried jobs which were lost earlier have been revived and some of the labour that migrated to the farms has come back to these salaried jobs. Second, economic activity is likely to have revived to absorb additional people in the form of daily wage labourers, said Mahesh Vyss, MD & CCBC, CMIE, in a recent article.

According to the MG-NREGS dashboard, generation of person days under the scheme this yeart till October 4 this fiscal stood at 202 crore recorded in the entire 2020-21.

Monthly person days genera-

tion of work also fell to a 17-month low in September this year at a little over 18 crore. The data could see some revision in the coming days as pan-India compilation takes some time. The Centre had been gener-ous with the allocations for the MG-NREGS(the scheme's bud-get outlay for the last fiscal year was ₹1.11 lakh crore RE com-pared with ₹68,265 crore in

was ₹1.11 lakh crore RE compared with ₹68,265 crore in 2019-20).
The Budget outlay for the scheme for 2021-22 is ₹73,000 crore. The government might have to allocate more fund to meet the need for the demandation.

meet the need for the demand-driven scheme as the Centre has alreadyreleased close to ₹58,597 crore to run the scheme. The scheme's mandate under the MGNREG Act, 2005, isto provide at least 100 days of 'wage employment' in a finan-cial year to every rural house-hold whose adult member vol-unteers to do unskilled manual work. However, an average of work. However, an average of only 51.52 days of work were provided to such rural house-holds in 200-21 and this year, so far the figure is 35

### on need for model builder-buyer

agreement
"West Bengal had enacted
an identical law like RERA, but
westruckitdown as it failed the
test of repugnancy," Justice
Chandrachud said.

Chandrachud said.

However, the apex court refused to entertain some petitions filed by homebuyers who wanted a direction to the developers to compensate for the delay in giving possession of their flats. The Bench said that these homeburers con

delay in giving possession of their flats. The Bench said that these homebuyers can approach alternate fora like consumer courts for relief.

The apex court said, "Uniform builder-buyer agreement is required to be framed by the Centre to protect interests of alkhs of home buyers. This is an important issue on protection of buyers, often put on back foot by clauses in agreements made bybuilders... It is very important for consumer protection because builders try to put any number of clauses in the agreement which common people may not be aware of. It is important that this (model builder buyer agreement) is achieved in the country."

Senior counsel Vikas Singh

the country."
Senior counsel Vikas Singh
and Menaka Guruswamp
argued that the Real Estate and
Regulatory Authority Act, 2016,
there should be a model agreement for States to adopt and the
Centre was enjoined to frame a
model agreement to ensure
transparency, and fairness and
to restrain builders and agents
from induliering into unfair and

to restrain builders and agents from indulging into unfait and restrictive trade practices.

The absence of "model builder-buyer" agreements across the country have been the main cause behind the fraud, lack of transparency, criminal conspiracies

and unfair and arbitrary trade practices in the real estate sec-tor, they submitted. Singh argued that not a sin-gle state had framed agreements

glestate had framed agreements to maintain transparency and there were many cases of delib-erate delay in handing over pos-session. The police did not regis-ter First Information Reports on the complaints lodged by buyers, he said.

the complaints lodged by buyers, he said.

"Builders issue revised delivery schedule again and again, adopted unfair practices... All this amounts to cheating, conspiracy, criminal breach of trust, dishonestly inducing delivery of property, violation of corporate law; Upadhyay said in his petition. The lawyers told the SC that Section 41 of the RERA mandated the establishment of a Central Advisory Council and Section 42 says that the Council would ensure the implementation of the Act. However, the court prima facie said the RERA did provide sufficient enabling powers to the Council to make Rules to prevent buyers from being exploited.
Framp a model builder-buyer agreement, to

Frame a model builder-buyer agreement and model agent-buyer agreement to infusetransparency, ensurefair play, reduce frauds and deliber-ate delays, restrain builders/promoters/agents from indulging into arbitrary, unfair and restrictive trade practices and to protect the rights and interests of cus-tomers in the spirit of the RERA Act of 2016, the petitions said.

### Invesco urges NCLT to order Zee EGM

"I do believe that I welcome all the feedback and look for-ward to a very robust and healthy consultations with all the stake-holders...We are trying to balance

everybody's interest and come up with a robust framework in which this (policy) can be imple-mented in the interest of all Indians,"Goyal said.

ans; Goyal said.

Thevery purpose of releasing draft rules is to elicit public opinion, ideas from other departments, from stakeholders, encourage feedback, he said, adding the government has always believed in engaging with all the stakeholders before taking a final decision on any policy.

Citing example of data privacy law, national education policy and jewellery hallmarking norms, he said the government conducts stakeholders consultation to arrive at a good decision.

norms, he said the government conducts stakeholders consultation to arrive at a good decision. Domestic jewellers are now appreciating the hallmarking porms, which they were opposing earlier tooth and nail, he said. "The consumer rules around thee-commerce are under public consultation. I warmly welcome feedback from various stakeholders but I have to protect everybody's interest and balance consumers interest, accommerce interests, retailers interests," he said, adding that "everybody's interest will be taken into consideration and a balanced and a very robust policywill be finalised." When asked if there is any move to link all the policies together, he said every department has to protect its own stakeholders.

# Copper holds attractive future demand prospects

ITWAS A given that the closure of 400,000 tonne capacity smelter at coastal Thoothukudi by the Tamil Nadu government on grounds of violation of enviby the Iamin Nadu government on grounds of violation of environmental norms in May 2018 would result in the country's import requirements of refined opper and also scrap for secondary production of red metal soaring. The owner of the benighted smelter Vedanta group so far had no success in restarting the smelter even while it had promised environment friendly operation. So much being at stake, the aluminium to zinc to copper componerate continues to engage with the government and the court to be enabled to restart the plant.

The impact of Thoothukudi plant shutdown was rudely felt furing 2019–20 when as much as 45% of 750,000 tome domestic copper demand had obmestic copper demand had

as 45% of 750,000 tonne domestic copper demand had to be met by imports of 335,000 tonnes. Major operational dislocation in Indian metals sector perse and copper was no exception happened in 2020-21 in the wake of the Covid-19 pandemic related lockdowns in the first two quarters in particular. Stalling of Infrastructure projects, fallin production of automobiles and components thereof and setback in white goods output, all these combined to shrink copper demand by a whopping per demand by a whopping per demand by a whopping 24% to 566,000 tonnes in the

24% to 566,000 tonnes in the ill-omened last year. Copper being most sensitive to macroeconomic developments, the metal is still the best bellwether for the local as well as global economy. Last year, it once again faithfully reflected the pains the economy in general suffered. Incidentally, as local use of copper shrank by 184,000 tonnes to 566,000 tonnes on a year-onyear basis, imports totalling. year basis, imports totalling 178,000 tonnes met 31% total

178,000 tonnes met 31% total demand.

The Indian copper industry had to contend with low demand of 118,000 tonnes in the first quarter of 2021-22 compared with 161,000 tonnes in the final three monthsoflastyveat. However, at arcent earnings call, Hindalco managing director 54tish Pai said." The demand is expected to improve steadily to a normalised level in the next few quarters due to declining Covid

Adani group, which has a Adani group, which has a rapidly expanding profile in solar and wind energy, plans to build a smelter of 1 MT capacity at Mundra in Gujarat

cases and the phased unlocking

cases and the phased unlocking in the country."

Beyond medium term by when the low base effect on current demand has worn thin, the use of copper in India is to see an annual growth rate of 8% or more enabled by rising demand from traditional sectors such electrical applications, building and construction and white goods such as air-conditioners, refrigerators and washing machines and also from growing official focus on decarbonising the economy. For example, as the country readies to progressively step up production of electrical vehicles (EVs), a major copper use area will open up. EVs will require five times more copper than vehicles made with internal combustion engine (ICE). nal combustion engine (ICE). A good amount of red metal will be used in making batter-ies for EVs, cables and charging stations. tions. Then as India nursues the

stations.

Then as India pursues the target of achieving non-fossil fuel based energy resources constituting around 40% of cumulative electric power installed capacity, a major demand avenue for copper will open up. In the Indian basket of sustainable clean energy, solar power will have pride of place since this tropical country has the potential to draw a vast amount of electricity from the blazing sun. The National Institute of Solar Energy estimates India's solar power potential at 748 gw. But the immediate target of prime minister's solar mission is to achieve a solar capacity of 100 gigavart. The country seen as the fourth most attractive renewable energy market in the world is placed fifth in global solar power pecking order. But what

does solar energy hold for cop-peruse. Alot since creation of 1 mu of solar cell capacity will need 6 tonnes of copper. Simi-lady, in renewable wind energy, considerable amount of copper is used in the generator, abling and transformer of a turbine. Thus in view of the attractive future demand prospects for copper, at least two major Indian groups have shown keen interest in building large coast based smetters. Smelters in India should ideally be located in coastal areas, for located in coastal areas, for their operation will be entirely based on imported copper con-centrate, the local availability of smelter feedstock being negli-gible. This cannot be otherwise since the country has only 0.31% of world copper ore

0.31% of world copper ore reserves. Naturally, it has a miniscule share of 0.2% of global ore production. Against all this, India even at a low per capita use of 0.5 kg against global average of 3.1 kg accounts for around 3% of global copper consumption. What, however, obtains here is nothing unique. Take China, which last year dwarfed all other copper producing countries by making 10.021 million tonnes (MT) of refined metal out of a world total of 2.3.3 MT had to import 21.77 MT of concentrate, 1.03 MT of unrefined copper such as blister, anode and ingots and 240,000 tonnes of scrap to

MT of unrefined copper such as blister, anode and ingots and 940,000 tonnes of scrap to feed its smelters. Japan, which runs the world's third largest copper smelting and refining industry with production of 1.6 MT in 2020 is entirely dependent on metal in concentrate imports.

When recently Vedanta sought expression of interest from state governments in hosting a 500,000 tonne smelter, the move was seen as a replacement for the shut smelter, darking roup, which has a rapidly expanding profile in solar and wind energy plans to build a much bigger smelter of 1. MT capacity at Mundra in Gujarat. While 90% of Adami smelter capacity will be used to process concentrate, scrap will be the feedstock for remaining capacity.

### MG-NREGS data: Demand for work at 17-month low

According to the CMIE's data, employment in September 2021 was estimated to be at 406.2 million, the highest in 20

406.2 million, the highest in 20 months or since the Covid-19 shock in March 2020.
At the same time, the number of "farmers" in the country fell from 116 million in August 2021 to 113.6 million in September 2021, asper CMIE. "This fall could imply a combination of two factors.

Eigst some salaried jobs

of two factors.

First, some salaried jobs
which were lost earlier have
been revived and some of the labour that migrated to the farms has come back to these salaried jobs. Second, economic activity is likely to have revived to absorb additional people in the form of daily wage labourers," said Mahesh Vyas, MD & CEO, CMIE, in a recent article.

CEO, CMIE, in a recent article.
According to the MGNREGS dashboard, generation
of person days under the
scheme this year till October 4
this fiscal stood at 202 crore
compared with 389.17 crore
recorded in the entire 2020-21.
Monthly person days genera-

tion of work also fell to a 17-

tion of work also fell to a 17-month low in September this year at a little over 18 crore. The data could see some revision in the coming days as pan-India compilation takes some time. The Centre had been generous with the allocations for the MG-NREGS (the scheme's budget outlay for the last fiscal year was ₹1.11 lakh crore RE compared with \$68,265 crore in 2019-20).

The Budget outlay for the

2019-20).

The Budget outlay for the scheme for 2021-22 is ₹73,000 crore. The government might have to allocate more fund to meet the need for the demand-driven scheme as the Centre has already released close to ₹58,597 crore to run the scheme

crore for un the scheme.

The scheme's mandate under the MGNREG Act, 2005, is to provide at least 1.00 days of wage employment' in a financial year to every rural household whose adult member volunteers to do unskilled manual work. However, an average of only 51.52 days of work were provided to such rural households in 200-21 and this year, so far, the figure is 35.

Sdi-Hitesh Vora Company Secretary and Compliance Officer

Chandrachud said.

However, the apex court refused to entertain some petitions filed by homebuyers who wanted adirection to the developers to compensate for the delay in giving possession of their flats. The Bench said that these homebuyers can approach alternate fora like consumer courts for railed.

test of repugnancy," Justice Chandrachud said.

approach alternate fora like consumer courts forrelief. The apex court said, "Uni-form builder-buyer agreement is required to be framed by the Centre to protect interests of lakhs of home buyers. This is an important issue on protection of buyers, often put on back foot by clauses in agreements made by builders... It is very important for consumer protection bybuilders...It is very important for consumer protection because builders try to put any number of clauses in the agreement which common people may not be aware of. It is important that this (model builder buyer agreement) is achieved in the country."

Sanior country Wiles Circ. 1.

Senior counsel Vikas Singh and Menaka Guruswamy argued that the Real Estate and argued that the Real Estate and RegulatoryAuthorityAct, 2016, there should be a model agree-ment for States to adopt and the Centire was enjoined to frame a model agreement to ensure transparency, and fairness and to restrain builders and agents from including into unfair and restrictive trade practices. The absence of "model builder-buyer and agent-buyer" agreements across the country have been the main cause behind the fraud, lack of trans-parency, criminal conspiracies

and unfair and arbitrary trade practices in the real estate sec-

tor, they submitted.
Singh argued that not a singlestate had framed agreements to maintain transparency and there were many cases of deliberate delay in handing over possession. The police did not register First Information Reports on the complaints lodged by buyers, he said.

ate delays, restrain builders/promoters/agents from indulging into arbitrary, unfair and restrictive trade practices and to protect the rights and interests of cus-tomers in the spirit of the RERA Act of 2016, the petitions said.

# Copper holds attractive future demand prospects

ITWAS Agiven that the closure of 400,000 tonne capacity smelter at coastal Thoothukudi smeiter at coastal i noothukudi by the Tamil Nadu government on grounds of violation of envi-ronmental norms in May 2018 would result in the country's

ongounts or towatton of environmental norms in May 2018 would result in the country's import requirements of refined copper and also scrap for secondary production of red metal soaring. The owner of the benighted smelter Vedanta group so far had no success in restarting the smelter even while it had promised environment friendly operation. So much being at stake, the aluminum to zinc to copper conglomerate continues to engage with the government and the court to be enabled to restart the plant.

The impact of Thoothukudi plant shutdown was rudely felt during 2019-20 when as much lost the summary of 750,000 tonnes donestic copper demand had to be met by imports of 335,000 tonnes. Major operational dislocation in Indian metals sector perse and copper was no exception happened in 2020-21 in the wake of the covid-19 pandemic related lockdowns in the first two quarters in particular. Stalling of infrastructure projects, fall in production of automobiles and components thereof and setback in white goods output, all these combined to shrink copper demand by a whopping 24% to 566,000 tonnes in the ill-omened last year.

24% to 566,000 tonnes in the ill-omened last year.

Copper being most sensitive to macroeconomic developments, the metal is still the best bellwether for the local as well as global economy. Last year, it once again faithfully reflected the pains the economy in general suffered. Incidentally, as local use of copper shrank by 184,000 tonnes to 566,000 tonnes on a year-onyear basis, imports totalling year basis, imports totalling 178,000 tonnes met 31% total

178,000 tonnes met 31% total demand.

The Indian copper industry had to contend with low demand of 118,000 tonnes in the first quarter of 2021-20 compared with 161,000 tonnes in the first quarter of 2021-400 tonnes in the final three months of lastyear. However, at a recent earnings call, Hindalco managing director Satish Pai said: The demand is expected to improve steadily to a normalised level in the next few quarters due to declining Covid

Har Ek Kaam Desh Ke Naam / ISPATI IRADA

Adani group, which has a rapidly expanding profile ns to build a smelte 1 MT capacity at Mundra in Gujarat

cases and the phased unlocking in the country."

Beyond medium term by when the low base effect on current demand has worn thin, the use of copper in India is to see an annual growth rate of 8% or more enabled by rising demand from traditional sections, building and construction and white goods such as air-conditioners, refrigerators and washing machines and also from growing official focus ondecarbonising the economy. For example, as the country readies to progressively step up For example, as the country readies to progressively step up production of electrical vehicles (EVs), a major copper use area will open up. EVs will require five times more copper than vehicles made with internal combustion engine (ICE). A good amount of red metal will be used in making batteries for EVs, cables and charging stations

will be used in making batter-ies for EVs, cables and charging stations.

Then as India pursues the target of achieving non-fossil fuel based energy resources constituting around 40% of cumulative electric power installed capacity, a major demandavenue for copper will open up. In the Indian basket of sustainable clean energy, solar power will have pride of place since this tropical country has the potential to draw a vast amount of electricity from the lazing sun. The National Institute of Solar Energy estimates India's solar power protential at 748 gw. But the immediate target of prime minister's solar mission is to achieve a solar capacity of 100 gigawatt. The country seen as the fourth most attractive renewable energy market in the world is placed fifth in global solar power pecking order. But what

does solar energy hold for copperuse? Alot since creation of 1 mw of solar cell capacity will need of tonnes of copper. Similarly, in renewable wind energy, considerable amount of copper is used in the generator, cabling and transformer of a turbine.

Thus in view of the attractive future demand prospects for copper, at least two major Indian groups have shown keen interest in building large coast based smelters. Smelters in India should ideally be located in coastal areas, for located in coastal areas, for their operation will be entirely their operation will be entirely based on imported copper con-centrate, the local availability of smelter feedstock being negli-gible. This cannot be otherwise since the country has only 0.31% of world copper ore reserves.

Naturally, it has a miniscule Naturally, it has a miniscule share of 0.2% of global ore production. Against all this, India even at a low per capita use of 0.5 kg against global average of 3.1 kg accounts for around 3% of global copper consumption. What, however, obtains here is nothing unique.

Take China, which last year dwarfed all other copper producing countries by making 10.021 million tonnes (MT) of refined metal out of a world

10.021 million tonnes(MT) of refined metal out of a world total of 23.3 MT had to import 21.77 MT of concentrate, 1.03 MT of unrefined copper such asblister, anode and ingots and 940,000 tonnes of scrap to feed its smelters. Japan, which runs the world's third largest copper smelting and refining industry with production of

copper smelting and refining industry with production of 1.6 MT in 2020 is entirely dependent on metal in concentrate imports.

When recently Vedanta sought expression of interest from state governments in hosting a 500,000 tonne smelter, the move was seen as a male semant for the solution. smelter, the move was seen as a replacement for the shut smelter. Adami group, which has a rapidly expanding profile in solar and wind energy plans to build a much bigger smelter of 1. MT capacity at Mundra in Gujarat. While 90% of Adami smelter capacity will be used to process concentrate, scrap will be the feedstock for remaining the profile of the capacity will be the feedstock for remaining the capacity of the capacity will be the feedstock for remaining the capacity wi

### MG-NREGS data: Demand for work at 17-month low

According to the CMIE's data, employment in September 2021 was estimated to beat 406.2 million, the highest in 20 months or since the Covid-19 shock in March 2020.

At the same time 11

At the same time, the number of 'farmers' in the country fell from 116 million in August 2021 to 113.6 million in Sep-

2021 to 113.6 million in September 2021, asper CMIE. This fall could imply a combination of two factors.

First, some salaried jobs which were lost earlier have been revived and some of the labour that migrated to the labour that migrated to the farms has come back to these salaried jobs. Second, economic activity is likely to have revived to absorb additional people in the form of daily wage labourers,'s aid Mahesh Vyas, MID & CEO, CMIE, in a recent article.

According to the MG-NREGS dashboard, generation of person days under the scheme this year till October 4 this fiscal stood at 202 crore compared with 389.17 crore compared with 389.17 crore recorded in the entire 2020-21. Monthly person days genera-

recorded in the entire 2020-21. Monthly person days genera-

tion of work also fell to a 17-month low in September this year at alittle over 18 crore. The data could see some revision in the coming days as pan-India compilation takes some time. The Centre had been generous with the allocations for the MG-NREGS (the scheme's budget outlay for the last fiscal year was ₹1.11 lakin crore RE compared with ₹68,265 crore in 2019-20).

The Budget outlay for the scheme for 2021-22 is ₹73,000

scheme for 2021-22 is ₹73,000 crore. The government might have to allocate more fund to meet the need for the demand-driven scheme as the Centre has already released close to ₹58,97 crore to run the scheme.

The scheme's mandate under the MGRIEG Act, 2005, isto provide at least 100 days of wage employment' in a financial year to every rural household whose adult member volunteers to do unskilled manual work. However, an average of only 51.52 days of work were provided to such rural households in 200-21 and this year, so far, the figure is 35.

Real estate

### Real estate projects: Apex court stresses

### AUTHUM INVESTMENT & INFRASTRUCTURE LIMITED

SHIRPUR POWER PRIVATE LIMITED - IN LIQUIDATION

### on need for model builder-buyer agreement

agreement

"West Bengal had enacted
an identical law like RERA, but
westruckit downasit failed the
test of repugnancy," Justice
Chandrachud said.
However, the apex court
refused to entertain some petitions filed by homebuyers who
wanted a direction to the develmers, to compensate for the

opers to compensate for the opers to compensate for the delay in giving possession of their flats. The Bench said that these homebuyers can approach alternate fora like consumer courts for relief. The apex court said, "Uni-form builder-buyer agreement is required to be framed by the

is required to be framed by the Centre to protect interests of lakhs of home buyers. This is an important issue on protection ofbuyers, often put on back foot by clauses in agreements made bybuilders. It is very important for consumer protection because builders try to put any number of clauses in the agreement which common people may not be aware of. It is important that this (model builder buyeragreement) is achieved in buyer agreement) is achieved in

buyeragreement) is achieved in the country.

Senior counsel Vikas Singh and Menaka Guruswamy argued that the Real Estate and Regulatory Authority, Act, 2016, there should be a model agreement for States to adopt and the Centre was renjoined to frame a model agreement to ensure transparency, and fairness and to restrain builders and agents from indulging into unfair and

to restrain builders and agents from indulging into unfair and restrictive trade practices.

The absence of "model builder-buyer and agent-buyer agreements across the country have been the main cause behind the fraud, lack of transparency, criminal conspiracies

and unfair and arbitrary trade practices in the real estate sector, they submitted.

tor, they submitted.
Singh argued that not a single state had framed agreements to maintain transparency and there were many cases of deliberate delay in handing over possesion. The police did not register First Information Reports on the complaints lodged bybuyers, he said.

Builders issue revised delivery schedule again and again, adopted unfair practices... All this amounts to cheating, conspiracy, criminal

again, adopted untair prac-tices... All this amounts to cheating, conspiracy, criminal breach of trust, dishonestly inducing delivery of property, violation of corporate laws," Upadhyay said in his petition. The lawyers told the SC that Section 41 of the RERA man-dated the establishment of a Central Advisory Council and Section 42 says that the Coun-cilwould ensure the implemen-tation of the Act. However, the court prima face said the RERA did provide sufficient enabling powers to the Council to make Rules to prevent buyers from being exploited. Frame a model builder-buyer agreement and model agent-buyer agreement to fuffuse transparency, ensure fair play, reduce frauds and deliber-forted.

play, reduce frauds and deliber play, reduce frauds and deliberate delays, restrain builders/promoters/agents from indulging into arbitrary, unfair and restrictive trade practices and to protect the rights and interests of customers in the spirit of the RERA Act of 2016, the petitions said.

### Invesco urges NCLT to order Zee EGM

"I do believe that I welcome all the feedback and look for-ward to a very robust and healthy consultations with all the stake-holders...We are trying to balance

everybody's interest and come up with a robust framework in which this (policy) can be imple-mented in the interest of all Indians,"Goval said.

ans, Goyal said.
The very purpose of releasing draft rules is to elicit public opinion, ideas from other departments, from stakeholders, encourage feedback, he said, adding the government has always believed in engaging with all the stakeholders before taking final decisions are more than the stakeholders before taking final decisions are more than the stakeholders before taking final decisions are more than the stakeholders before taking final decisions are more than the stakeholders before taking final decisions are more than the stakeholders before taking final decisions are more than the stakeholders before taking final decisions are more than the stakeholders before taking final decisions are successful.

all the stakeholders before tak-ing a final decision on any policy. Citing example of data pri-vacy law, national education pol-icy and jewellery hallmarking norms, he said the government conducts stakeholders consulta-tion to arrive at a good decision. Domestic jewellers are now appreciating the hallmarking norms, which they were oppos-ing earlier tooth and nail, he said. "The consumer rules around the e-commerce are under rulb-

"The consumer rules around the e-commerce are under public consultation. I warmly well-come feedback from various stakeholders but I have to protect everybody's interest and balance consumers interest, ecommerce interests, retailers interests," he said, adding that "everybody's interest will be taken into consideration and a balanced and a wear receiver." taken into consideration and a balanced and a very robust pol-icy will be finalised."

When asked if there is any move to link all the policies

together, he said every depart-ment has to protect its own stakeholders.

to assert that January 6 occurred

# Copper holds attractive future demand prospects

ITWASA given that the closure of 400,000 tonne capacity smelter at coastal Thoothukudi by the Tamil Nadu government on grounds of violation of environmental norms in May 2018 would result in the country's import requirements of refined copper and also scrap for sec-ondary production of red metal ondary production of red metal soaring. The owner of the benighted smelter Vedanta group so far had no success in restarting the smelter even while it had promised environment friendly operation. So much being at stake, the aluninum to lien to copper conglomerate continues to engage with the government and the court to be enabled to restart the plant.

the plant.

The impact of Thoothukudi plant shutdown was rudely felt during 2019-20 when as much as 45% of 750,000 tonne domestic copper demand had to be met by imports of 335,000 tonnes. Major operational dislocation in Indian metals sector perse and copper metals sector press and copper tional dislocation in Indian metal sector perse and copper was no exception happened in 2020-21 in the wake of the Covid-19 pandemic related lockdowns in the first two quarters in particular. Stalling of infrastructure projects, fall in production of automobiles and components thereof and sethesically of the components of the production of such with the combined to shrink copper demand by a whopping 2496 to 566,000 tonnes in the ill-omened last year.

24% to 566,000 tonnes in the ill-omened last year.

Copper being most sensitive to macroeconomic developments, the metal is still the best beliwether for the local as well as global economy. Last year, it once again faithfully reflected the pains the economy in general suffered. Incidentally, as local use of coppe shrank by 184,000 tonnes to 566,000 tonnes on a year-onyear basis, imports totalling year basis, imports totalling 178,000 tonnes met 31% total

178,000 tonnes met 31% total demand.

The Indian copper industry had to contend with low demand of 118,000 tonnes in the first quarter of 2021-2 compared with 161,000 tonnes in the final three months of lastyear. However, at a recent earnings call, Hindalo managing director Satish Pai said: "The demand is expected to improve steadily to a normalised level in the next few quarters due to declining Covid

Adani group, which has a rapidly expanding profile in solar and wind energy, plans to build a smelter of 1 MT capacity at Mundra in Gujarat

cases and the phased unlocking

cases and the phased unlocking in the country."

Beyond medium term by when the low base effect on current demand has worn thin, the use of copper in India is to see an annual growth rate of 8% or more enabled by rising demand from traditional sectors such electrical applications, building and construction and white goods such as air-conditioners, refrigerators and washing machines and air-conditioners, refrigerators and washing machines and also from growing official focus on decarbonising the economy. For example, as the country readies to progressively step up production of electrical vehicles (EVs), a major copper use area will open up. EVs will require five times more copper than vehicles made with internal combustion engine (ICE). A good amount of red metal will be used in making batteries for EVs, cables and charging stations.

ies for EVs, cables and charging stations.

Then as India pursues the target of achieving non-fossil fuel based energy resources constituting around 40% of cumulative electric power installed capacity, a major demand avenue for copperwill open up. In the Indian basket of sustainable clean energy, solar open up. In the Indian basket of sustainable clean energy, solar power will have pride of place since this tropical country has the potential to draw a vast amount of electricity from the blazing sun. The National Institute of Solar Energy estimates India's solar power potential at 748 gw. But the immediate target of prime minister's solar mission is to achieve a solar capacity of 100 gigawatt. The mission is to achieve a solar capacity of 100 gigawatt. The country seen as the fourth most attractive renewable energy market in the world is placed fifth in global solar power pecking order. But what

does solar energy hold for copdoes solar energy hold for cop-peruse? Alot since creation of 1 mw of solar cell capacity will need 6 tonnes of copper, Simi-larly, in renewable wind energy, considerable amount of copper is used in the generator, cabling and transformer of a turbine. Thus in view of the attrac-tive future demand prospects for copper, at least two major Indian groups have shown

for copper, at least two major Indian groups have shown keen interest in building large coast based smelters. Smelters in India should ideally be located in coastal areas, for their operation will be entirely based on imported copper con-centrate, the local availability of malter featers their and proper consmelter feedstock being negli-gible. This cannot be otherwise since the country has only 0.31% of world copper ore

reserves. Naturally, it has a miniscule Naturally, Inta a liminst cut share of 0.2% of global ore production. Against all this, India even at a low per capita use of 0.5 kg against global average of 3.1 kg accounts for around 3% of global copper consumption. What, however, obtains here is parthing union.

of global copper consumption. What, however, obtains here is nothing unique.

Take China, which last year dwarfed all other copper producing countries by making 10,021 million tonnes (MT) of refined metal out of a world dutal of 23.3 MT had to import 21.77 MT of concentrate, 1.03 MT of unrefined copper such as blister, anode and ingots and 940,000 tonnes of scrap to feed its smelters, lapan, which runs the world's third largest copper smelting and refining industry with production of 1.6 MT in 2020 is entirely dependent on metal in concentrate imports.

When recently Vedants ought expression of interest from state governments in hosting a 500,000 tonne smelter, the move was seen as a rapidly expanding profile in solar and wind energy plans to build a much bigger smelter of 1 MT capacity at Mundra in Gujarat. While 90% of Adami melter capacity will be used to process concentrate, scrap will be the feedstock for remaining capacity.

### **MG-NREGS** data: Demand for work at 17-month low

17-month low

According to the CMIE's
data, employment in September 2021 was estimated to be at
406.2 million, be heighest in 20
months or since the Covid-19
shock in March 2020.

At the same time, the number of Farmers' in the country
fell from 116 million in August
2021 to 113.6 million in September 2021, asper CMIE. This
fall could imply a combination
of two factors.
First, some salaried jobs

fall could imply a combination of two factors.

First, some salaried jobs which were lost earlier have been revived and some of the labour that migrated to the farms has come back to these salaried jobs. Second, economic activity is likely to have revived to absorb additional people in the form of daily wage labourers," said Mahesh Vyas, MD & CEO, CMIE, in a recent article.

According to the MG-MEGS dashboard, generation of person days under the scheme this year till October 4 this fiscal stood at 202 crore compared with 389.17 crore recorded in the entire 2020-21.

tion of work also fell to a 17-month low in September this year at a little over 18 crore. The data could see some revision in the coming days as pan-India compilation takes some time. The Centre had been gener-ous with the allocations for the

MG-NREGS (the scheme's bud-get outlay for the last fiscal year was ₹1.11 lakh crore RE com-pared with ₹68,265 crore in 2019-20).

The Budget outlay for the scheme for 2021-22 is ₹73,000 have to allocate more fund to meet the need for the demand-driven scheme as the Centre has already released close to ₹58,597 crore to run the scheme

The scheme's mandate under the MGNREG Act, 2005, isto provide at least 100 days of wage employment' in a financial year to every rural household whose adult member voluments. hold whose adult member vol-unteers to do unskilled manual work. However, an average of only 51.52 days of work were provided to such rural house-holds in 200-21 and this year, so far, the figure is 35.

### Real estate projects: Apex court stresses

# AUTHUM INVESTMENT & INFRASTRUCTURE LIMITED

### NOTICE OF RECORD DATE

### on need for model

### builder-buyer agreement

agreement
"West Bengal had enacted an identical law like RERA, but we strucklit down as it failed the test of repugnancy," Justice Chandrachud said.
However, the apex court refused to entertain some petitions filled by homebuyers who wanted a direction to the developers to compensate for the delay in giving possession of their flats. The Bench said that these homebuyers can approach alternate fora like consumer courts for relief.

approach alternate for a like consumer courts for relief.

The apex court sald, "Uniform bullder-buyer agreement is required to be framed by the Centre to protect interests of lakins offnome buyers. This is an important issue on protection ofbuyers, offens put on back forto by clauses in agreements made by buildlers. Like very important for consumer protection because builders try to put any number of clauses in the agreement which common people ment which common people.

because builders try to put any number of clauses in the agreement which common people may not be aware of. It is important that this (model builder buyeragreement) is achieved in the country."
Senior counsel Vikas Singh and Menaka Guruswamy argued that the Real Estate and Regulatory Authority Act., 2016, there should be a model agreement for States to adopt and the Centre was enjoined to frame a model agreement for states to adopt and the creating builders and agents from indulging into unfair and to restrain builders and agents from indulging into unfair and restrictive trade practices.

The absence of "model builder-buyer" agreements across the country have been the main cause behind the fraud, lack of transparency, criminal conspiracies

and unfair and arbitrary trade practices in the real estate sec-tor, they submitted. Singh argued that not a sin-gle state had framed agreements to maintain transparency and there were many cases of deline reate delay in handing overpos-session. The police did not regis-ter First Information Reports on ter First Information Reports on the complaints lodged by buyers, he said.

the rist illumination Reportson the complaints lodged bybuyers, he said.

"Builders issue revised delivery schedule again and again, adopted unfair practices... All this amounts to cheating, conspiracy, criminal breach of trust, dishonestly inducing delivery of property, violation of corporate laws," the lawyers told the SC that Central Advisory Council and Section 4.2 to 9 the RERA mandated the establishment of a Central Advisory Council and Section 42 says that the Council county prima face said the RERA did provide sufficient enabling powers to the Council to make Rules to prevent buyers from being exploited.

Frame a model builder-buyer agreement and model agent-buyer agreement of infuse transparency, ensured infuse transparency, ensured infuse transparency, ensured in fuse transparency ensured in fuse transp

buyer agreement and model agent-buyer agreement to infusetransparency, ensure fair play, reduce frauds and deliberate delays, restrain builders/promoters/agents from indulging into arbitrary, unfair and restrictive trade practices and to protect the rights and interests of customers in the spirit of the RERA Act of 2016, the petitions said.

### Invesco urges NCLT to order Zee EGM

"I do believe that I welcome all the feedback and look for-ward to avery robust and healthy consultations with all the stake-holders...We are trying to balance

everybody's interest and come up with a robust framework in which this (pollcy can be implemented in the interest of all Indians, Coyal said.

The very purpose of releasing draftrules is to elicit public opinion, ideas from other departments, from stakeholders, encourage feedback, he said, adding the government has always believed in engaging with all the stakeholders before takinga final decision on any policy. Citing example of data privacy law, national education policy and jewellery hallmarking, norms, he said the government conducts stakeholders sonsultation to arrive at a good decision. Domestic jewellers are now appreciating the hallmarking norms, which they were opposing enginetro oth and nail, he said. "The consumer rules around the e-commerce are under public consultation. I warmly wed-come feedback from various stakeholders but I have to protect everybody's interest and belance consumers, therets, the said, adding that "everybody's interest and balanced and a very pobust policy will be finalised." When asked if there is any move to link all the policies together, he said the policies together.

ment has to protect its own stakeholders.

# Copper holds attractive future demand prospects

ITWASA given that the closure of 400,000 tonne capacity smelter at coastal Thoothukudi by the Tamil Nadu government on grounds of violation of environmental norms in May 2018 would result in the country's interest and interest of the country's country in the country would result in the country's import requirements of refined copper and also scrap for secondary production of red metal soaring. The owner of the benighted smelter Vedanta group so far had no success in restarting the smelter even while it had promised environment friendly operation. So while thad promised environ-ment friendly operation. So much being at stake, the alu-minium to aim to copper con-glomerate continues to engage with the government and the court to be enabled to restart the plant.

The impact of Thoothukud plant shutdown was rudely felt during 2019–200 when as much as 45% of 750,000 tonne domestic copper demand had

during 2019-20 when as much as 45% of 750,000 tonne domestic copper demand had to be met by imports of 335,000 tonnes. Major operational dislocation in Indian metals sector perse and copper demands and composition of the covid-19 pandemic related lockdowns in the first two quarters in particular. Stalling of infrastructure projects, fall in production of automobiles and components thereof and sether of the components of the components, the metal is still the best hellwether for the local savell as global economy. Last year, it once again faithful prefered the pains the concept to the components of the pains the components of the pains the components of the pains the concept to the components of the pains the concept the components of the pains the concept to the components of the pains the concept to the concept to the contract of the concept to the contract of the co

omy in general surfered. Incredentally, as local use of copper shrank by 184,000 tonnes to 566,000 tonnes on a year-on-year basis, imports totalling 178,000 tonnes met 31% total

denand
The Indian copper industry
had to contend with low
demand of 118,000 tonnes in
the first quarter of 2021-22
compared with 161,000
tonnes in the final three
months of last year. However, at
arcentearnings call, Hindadco
managing director Satish Pai
said: "The demand is expected
to improve steadily to a normalised level in the next few
quarters due to declining Covid

Adani group, which has a rapidly expanding profile in solar and wind energy, plans to build a smelter of 1 MT capacity at Mundra in Gujarat

cases and the phased unlocking in the country."

Beyond medium term by when the low base effect on current demand has worn thin, the use of copper in India is to see an annual growth rate of 8% or more enabled by rising demand from traditional sectors such electrical applications, building and constructions. tors such electrical applica-tions, building and construc-tion and white goods such as air-conditioners, refrigerators and washing machines and also from growing official focus on decarbonising the economy. For example, as the country readies to progressively stepu production of electrical vehi-cles (EVs), a major copper use area will open up. EVs will require five times more copper than vehicles made with inter-nal combustion engine (ICS). nal combustion engine (ICE). A good amount of red metal will be used in making batter-ies for EVs, cables and charging stations Then as India pursues the

stations. Then as India pursues the target of achieving non-fossil fuel based energy resources constituting around 40% of cumulative electric power installed capacity, a major demand avenue for copper will open up. In the Indian basket of sustainable Celean energy, solar power will have pride of place since this tropical country has the potential to draw a vast amount of electricity from the blazing sun. The National Institute of Solar Energy estimates India's solar power potential at 748 gw. Butthe immediate tarraget of prime minister's solar mission is to achieve a solar capacity of 100 gigawatt. The country seen as the fourth most attractive renewable energy market in the world is placed fifth in global solar power pecking order. But what

does solar energy hold for coppersuse? Alot since creation of 1 mw of solar cell capacity will need 6 tonnes of copper. Similarly, in renewable wind energy, considerable amount of copper is used in the generator, cabling and transformer of a turbine. Thus in view of the attractive future demand prospects for copper, at least two major Indian groups have shown keen interest in building large coast based smelters. Smelters in India should ideally be located in coastal areas, for their operation will be entirely based on imported copper concentrate, the local availability of smelter feedstock being negligible. This cannot be otherwise since the country has only 0,31% of world copper or reserves.

10.31 m of world copper for reserves.

Naturally, it has a miniscule share of 0.29 sof global ore production. Against all this, India even at a low per capita use of 0.5 kgaagainst global average of 0.5 kgaagainst global averages of 0.5 kgaagainst global averages of 0.5 kgaagainst global averages of 1.8 kg. counts for a control world and the competence of 1.8 kg. counts of 1.8 kg. counts

For Ambuja Cements Ltd Date: 04-10-2021

### tion of work also fell to a 17-month low in September this year at a little over 18 crore. The data could see some revision in the coming days as pan-India compilation takes some time. MG-NREGS data: Demand for work at 17-month low

1 /-MONUN IOW

According to the CMIE's data, employment in September 2021 was estimated to be at 406.2 million, the highest in 20 months or since the Covid-19 shock in March 2020.

At the same time, the number of farmers' in the country left from 116 in million in August 2021 to 113.6 million in September 2021 3 was CMIE. "This

tember 2021, as per CMIE. "This fall could imply a combination

fall could imply a combination of two factors.

First, some salaried jobs which were lost earlier have been revived and some of the labour that migrated to the farms has come back to these salaried jobs. Second, economic activity is likely to have revived to absorb additional people in the form of daily wage labourers, said Mahesh Vyas, MD & CEO, CMIE, in a recent article.

According to the MG-NECO Salaborat, generation of person days under the scheme this yeart ill October 4 this fiscal stood at 202 crore compared with 389.17 crore recorded in the entire 2020-21.

ded in the entire 2020-21. Monthly person days genera-

compilation takes some time.

The Centre had been generous with the allocations for the MG-NREGS (the scheme's budget outlay for the last fiscal year was ₹1.11 lakh crore RE compared with 688,265 crore in 2019-20).

The Budget outlay for the scheme for 2021-22 is ₹73,000 crore. The government might have to allocate more fund to meet the need for the demand-

meet the need for the demand-driven scheme as the Centre has already released close to ₹58,597 crore to run the scheme.

crore to run the scheme.

The scheme's mandate under the MGNREG Act, 2005, isto provide at least 100 days of wage employment' in a financial year to every rural household whose adult member volunteers to do unskilled manual work. However, an average of only 51.52 days of work were provided to such rural households in 200-21 and this year, so far, the figure is 35.

### on need for model builder-buver agreement

"West Bengal had enacted an identical law like RERA, but westruck it down as if failed the test of repugnancy," justice Chandrachud said.

However, the apex court refused to entertain some petitions filed by homebuyers who wanted adirection to the developers to compensate for the debts in scientific research and the control of the debts in scientific research and debts in scientific research a delay in giving possession of their flats. The Bench said that

their flats. The Bench said that these homebuyers can approach alternate fora like consumer courts for relief.

The apex court sid, "Uni-form builder-buyer agreement is required to be framed by the Centre to protect interests of lakhsof home buyers. This is an important issue on protection of buyers, often put on back foot by datasets in a grownwist made. of buyers, often put on backroot by clauses in agreements made by builders... It is very important for consumer protection because builders try to put any number of clauses in the agreement which common people may not be aware of. It is important that this (model builder have a remembly achieved in buyeragreement) is achieved in the country."

Senior counsel Vikas Singh and Menaka Guran Senior counsel Vikas Singh and Menaka Guruswamy argued that the Real Estate and Regulatory Authority Act, 2016, there should be a model agreement for States to adopt and the Centre was enjoined to frame a model agreement to ensure transparency, and fairness and to restrain builders and agents from indulging into unfair and restrictive trade practices.

The absence of "model builder-buyer and agent-buyer" agreements across the country have been the main cause behind the fraud, lack of transparency, criminal conspiracies

and unfair and arbitrary trade practices in the real estate sec-tor, they submitted. Singh argued that not a sin-gle-state had framed agreements to maintain transparency and there were many cases of delib-erate delay in handing overpos-session. The police did not regis-ter First Information Reports on ter First Information Reports on the complaints lodged by buyers,

ter First Information Reports on the complaints lodged bybuyers, he said.

"Builders issue revised delivery schedule again and again, adopted unfair practices... All this amounts to cheating, conspiracy, criminal breach of trust, dishonestly inducing delivery of property, violation of corporate laws," Upadhyay said in his petition. The lawyers told the SC that Section 41 of the RERA mandated the establishment of a Central Advisory Council and Section 42 says that the Council would ensure the implementation of the Act. However, the court prima facies said the RERA did provide sufficient enabling powers to the Council to make full provide sufficient enabling powers to the Council to make full provide sufficient enabling powers to the Council to make gent-buyer agreement and model agent-buyer agreement to infuse transparency, ensure fair play, reduce frauds and deliberate delays, restrain builders/monters/acents

delays ate delays, restrain builders/promoters/agents from indulging into arbitrary, unfair and restrictive trade practices and to protect the rights and interests of customers in the spirit of the RERA Act of 2016, the petitions said.

### Invesco urges NCLT to order Zee EGM

"I do believe that I welcome all the feedback and look for-ward to a very robust and healthy consultations with all the stake-holders...We are trying to balance

everybody's interest and come up with a robust framework in which this (policy) can be imple-mented in the interest of all Indi-ans," Goyal said. The verypurpose of releasing draft rules is to elicit public opin-ion, ideas from other depart-ments, from stakeholders,

ion, ideas from other depart-ments, from stakeholders, encourage feedback, he said, adding the government has always believed in engaging with all the stakeholders before tak-inga final decision on any policy. Citing example of data pri-vacy law, national education pol-icy and jewellery hallmarking norms, he said the government conducts stakeholders consulta-tion to arrive at a good decision-

conducts state forms consultation to arrive at a good decision.

Domestic jewellers are now appreciating the hallmarking norms, which they were opposing earlier tooth and nail, he said.

"The consumer rules around the e-commerce are under public consultation. I warmly well-come, feedback from various."

come feedback from várious stakeholders but I have to prostakeholders but I have to pro-tect everybody's interest and balance consumers interest, ecommerce interests, retailers interests; he said, adding that "everybody's interest will be taken into consideration and a balanced and a very robust pol-icywill be finalised."
When a sked if there is any

When asked if there is any move to link all the policies together, he said every depart-ment has to protect its own stakeholders.

# Copper holds attractive future demand prospects

### KUNAL BOSE

ITWASA given that the closure of 400,000 tonne capacity smelter at coastal Thoothukudi by the Tamil Nadu government on grounds of violation of environmental norms in May 2018 would result in the country's import requirements of refined copper and also scrap for secondary production of red metal soaring. The owner of the benighted smelter Vedanta groups of a rhad no success in restarting the smelter even while it had promised environment friendly operation. So much being at stake, the aluminium to zinc to copper congomerate continues to engage with the government and the court to be enabled to restart the plant.

the plant.
The impact of Thoothukudi The impact of Thoothukudi plant shutdown was rudely felt during 2019-20 when as much as 45% of 750,000 tonue domestic copper demand had to be met by imports of 335,000 tonnes. Major operational dislocation in Indian metals sector perse and copper was no exception happened in 2020-21 in the wake of the Covid-19 pandemic related 2020-21 in the wake of the Covid-19 pandemic related lockdowns in the first two quarters in particular. Stalling of infinstructure projects, fall in production of automobiles and components thereof and setaken in white goods output, all these combined to shrink coper downed by a whomeior per demand by a whopping 24% to 566,000 tonnes in the

24% to 566,000 tonnes in the ill-omened last year.
Copper being most sensitive to macroeconomic developments, the metal is still the best bellwether for the local as well as global economy. Last year, it once again faithfully reflected the pains the economy in general suffered. Incidentally, as local use of copper shrank by 184,000 tonnes to 566,000 tonnes on a year-onsear basis, imports totalling year basis, imports totalling 178,000 tonnes met 31% total

178,000 tonnes met 31% total demand.

The Indian copper industry had to contend with low demand of 118,000 tonnes in the first quarter of 2021-2. compared with 161,000 tonnes in the first quarter of 2021-2. at a recent earnings call, Hindalo manging director Satish Pai said: "The demand is expected to improve steadily to a normalised level in the next few quarters due to declining Covid

Adani group, which has a rapidly expanding profile in solar and wind energy, ns to build a smelte 1 MT capacity at Mundra in Gujarat

cases and the phased unlocking in the country."

Beyond medium term by when the low base effect on current demand has worn thin, the use of copper in India is to see an annual growth rate of 8% or more enabled by rising demand from traditional sectors such electrical applications, building and construction and white goods such as air-conditioners, refrigerators and washing machines and also from growing official focus on decarbonising the economy. For example, as the country readies to progressively step up For example, as the country readies to progressively step up production of electrical vehicles (EVs), a major copper use area will open up. EVs will require five times more copper than vehicles made with internal combustion engine (ICE). A good amount of red metal will be used in making batteries for EVs, cables and charging stations.

ies for EVs, cables and charging stations.

Then as India pursues the target of achieving non-fossil fuel based energy resources constituting around 40% of cumulative electric power installed capacity, a major demand avenue for copper will open up. In the Indian basket of sustainable clean energy, solar nower will have mide of fuleze sustainable clean energy, solar power will have pride of place since this tropical country has the potential to draw a wast amount of electricity from the blazing sun. The National Institute of Solar Energy estimates India's solar power potential at 748 gw. Butthe immediate target of prime minister's solar mission is to achieve a solar capacity of 100 gigavatt. The country seen as the fourth most attractive renewable energy market in the world is placed fifth in global solar power pecking order. But what does solar energy hold for copperuse? Alot since creation of 1 mw of solar cell capacity will need 6 tonnes of copper. Similarly, in renewable wind energy, considerable amount of copper is used in the generator, cabling and transformer of a turbine. Thus in view of the attractive future demand prospects for copper, at least two major Indian groups have shown keen interest in building large coast based smelters. Smelters

keen interest in building large coast based smelters. Smelters in India should ideally be located in coastal areas, for their operation will be entirely based on imported coppercon-centrate, the local availability of smelter feedstock being negli-gible. This cannot be otherwise since the country has only 0.31% of world copper ore reserves.

Naturally, it has a miniscule Naturally, it has a miniscuse share of 0.2% of global ore production. Against all this, India even at a low per capita use of 0.5 kg against global average of 3.1 kg accounts for around 3% of global copper consumption. What, however, obtains here is a stable against global.

3-1. Ig accounts for a found 3% of global copper consumption. What, however, obtains here is nothing unique.

Take China, which last year dwarfed all other copper producing countries by making 10,021 million tonnes (MT) of refined metal out of a world total of 2.3.3 MT had to import 21.77 MT of concentrate, 1.03 MT of unrefined copper such as blister, anode and ingots and 940,000 tonnes of scrap to feed its smelters, Japan, which runs the world's third largest copper smelting and refining industry with production of 1.6 MT in 220 is entirely dependent on metal in concentrate imports.

When recently Vedants sought expression of interest from state governments in hosting a 500,000 tonne smelter, the move was seen as a replacement for the shut smelter. Adamigroup, which has a rapidly expanding profile in solar and wind energy plans to build a much bigger smelter of MT capacity at Mundra in Guiarat. While 90% of Adami smelter capacity will be used to process concentrate, scrap will be the feedstock for remaining capacity.

(Aformer FT correspondent, the author is now India correspondent for Euro Money publication Metal Market Magazine.)

The scenario was not different in

The scenario was not different in mid-cap and small-cap schemes of MFs either, which witnessed 57.1% of the schemes trailing the movement in the respective benchmarks, S&P Indices Versus Active (SPIVA) said in its half-yearly report.

Lucknow
